

# Contents

## Section 1: Clinical Chemistry and Other Laboratory Tests 1

### 1. Basic Principles of Laboratory Medicine 3

- Preanalytical Phase 3
- Analytical Phase 8
- Postanalytical Phase 8
- Gaussian Distribution and Reference Ranges 8
- Interpretation of Laboratory Tests 8
- Test Performance Specifications 9
- Diagnostic Value of a Test 10
- Quality Assurance 11
- Quality Control 12
- Credentials of a Laboratory 13
- Point of Care Testing 13
- Safety in the Clinical Laboratory 14

### 2. Examination of Urine 16

- Composition of Normal Urine 16
- Indications for Urinalysis 16
- Collection of Urine 16
- Changes which Occur in Standing Urine at Room Temperature 17
- Physical Examination 18
- Chemical Examination 21
- Microscopic Examination 34

### 3. Kidney Function Tests 43

- Structure and Function of Kidney 43
- Factors Affecting Kidney Function 45
- Indications for Kidney Function Tests 45
- Nomenclature 45
- Classification of Kidney Function Tests 46
- Tests to Evaluate Glomerular Function 46
- Tests to Evaluate Tubular Function 53
- Kidney Biopsy 54

### 4. Laboratory Tests in Diabetes Mellitus 58

- Metabolic Actions of Insulin 58
- Classification of Diabetes Mellitus 58
- Prediabetes 61
- Metabolic Alterations in Diabetes Mellitus 62
- Long-term Complications of Diabetes Mellitus 62
- Role of Laboratory in Diabetes Mellitus 63

### 5. Liver Function Tests 71

- Functions of Liver 71
- Indications and Limitations of Liver Function Tests 73
- Classification of Liver Function Tests 73
- Tests that Assess Excretory Function of the Liver 73
- Tests which Assess Synthetic and Metabolic Functions of Liver 77
- Tests which Assess Hepatic Injury (Liver Enzyme Studies) 79
- Tests that Assess Clearance of Exogenous Substances from the Liver 81
- Interpretation of Liver Function Tests 81
- Liver Biopsy 82
- Types of Liver Biopsy 83

### 6. Laboratory Tests in Disorders of Lipids 86

- Physiology 86
- Classification of Lipoprotein Disorders 88
- Laboratory Tests for Lipoprotein Disorders 89

### 7. Biochemical Cardiac Markers 92

- Acute Coronary Syndrome 92
- Biochemical Cardiac Marker Studies 94
- Other Cardiac Injury Markers 97
- Cardiac Markers with Prognostic Significance 97
- Cardiac Marker for Congestive Cardiac Failure 97

### 8. Examination of Cerebrospinal Fluid 98

- Composition of Normal Cerebrospinal Fluid 98
- Circulation of CSF 98
- Functions of Cerebrospinal Fluid 98
- Collection of Cerebrospinal Fluid 98
- Indications for Lumbar Puncture 100
- Complications of Lumbar Puncture 101
- Contraindications to Lumbar Puncture 101
- Laboratory Examination of Cerebrospinal Fluid 101

### 9. Examination of Serous Body Fluids and Synovial Fluid 109

- Serous Fluids 109
- Synovial Fluid 116

<b>10. Examination of Sputum</b>	<b>121</b>	<ul style="list-style-type: none"> <li>● Collection of Sputum 121</li> <li>● Appearance of Sputum 121</li> <li>● Microbiological Examination 121</li> <li>● Examination of Sputum For Mycobacterium Tuberculosis 123</li> <li>● Examination for Other Organisms 125</li> <li>● Cytological Examination of Sputum 126</li> </ul>
<b>11. Examination of Feces</b>	<b>127</b>	<ul style="list-style-type: none"> <li>● Uses of Laboratory Examination of Feces 127</li> <li>● Microscopic Examination 128</li> <li>● Color/Appearance of Fecal Specimens 129</li> <li>● Bacterial Infections 137</li> <li>● Viral Infections 137</li> <li>● Chemical Examination 140</li> <li>● Fecal Molecular Testing 143</li> </ul>
<b>12. Gastric Analysis</b>	<b>144</b>	<ul style="list-style-type: none"> <li>● Normal Gastric Anatomy and Physiology 144</li> <li>● Functions of Stomach 145</li> <li>● Indications for Gastric Analysis 145</li> <li>● Contraindications to Gastric Analysis 146</li> <li>● Method of Gastric Analysis 147</li> <li>● Other Tests for Gastric Analysis 148</li> </ul>
<b>13. Tests for Malabsorption and Pancreatic Function Tests</b>	<b>150</b>	<ul style="list-style-type: none"> <li>● Malabsorption Syndromes 150</li> <li>● Pancreatic Function Tests 155</li> </ul>
<b>14. Thyroid Function Tests</b>	<b>159</b>	<ul style="list-style-type: none"> <li>● Anatomy and Physiology of Thyroid 159</li> <li>● Disorders of Thyroid 161</li> <li>● Thyroid Function Tests 164</li> <li>● Free Thyroxine (FT4) 165</li> </ul>
<b>15. Laboratory Tests in Pregnancy</b>	<b>168</b>	<ul style="list-style-type: none"> <li>● Pregnancy Tests 168</li> <li>● First and Second Trimester Screening for Cytogenetic Defects and Neural Tube Defects 171</li> <li>● Non-invasive Fetal DNA Analysis 173</li> <li>● Assessment of Risk of Preterm Labor 173</li> <li>● Determination of Fetal Lung Maturity 174</li> <li>● Amniotic Fluid Bilirubin 175</li> <li>● Laboratory Evaluation of Diseases during Pregnancy 175</li> <li>● Laboratory Tests in Recurrent Pregnancy Loss 177</li> </ul>
<b>16. Infertility</b>	<b>178</b>	<ul style="list-style-type: none"> <li>● Male Infertility 178</li> <li>● Female Infertility 180</li> </ul>
<b>17. Semen Analysis</b>	<b>186</b>	<ul style="list-style-type: none"> <li>● Indications for Semen Analysis 186</li> <li>● Collection of Semen for Investigation of Infertility 187</li> <li>● Examination of Seminal Fluid 187</li> <li>● Examination for the Presence of Semen in Medicolegal Cases 192</li> <li>● Examination of Semen to Check the Effectiveness of Vasectomy 192</li> </ul>
<b>18. Pyrexia of Unknown Origin</b>	<b>193</b>	<ul style="list-style-type: none"> <li>● Pathogenesis of Fever 193</li> <li>● Classic Pyrexia of Unknown Origin 193</li> <li>● Nosocomial Causes of PUO 197</li> <li>● Neutropenic PUO 197</li> <li>● Human Immunodeficiency Virus-related PUO 197</li> </ul>
<b>Section 2: Laboratory Hematology</b>		<b>199</b>
<b>19. Hematopoiesis</b>	<b>201</b>	<ul style="list-style-type: none"> <li>● Red Blood Cells 203</li> <li>● White Blood Cells 205</li> <li>● Thrombopoiesis 208</li> </ul>
<b>20. Collection of Blood</b>	<b>210</b>	<ul style="list-style-type: none"> <li>● Skin Puncture 210</li> <li>● Venous Blood Collection 210</li> <li>● Anticoagulants 212</li> <li>● Sequence of Filling of Tubes (Order of Draw of Blood Collection Tubes) 213</li> <li>● Common Sources of Error in Collection of Blood Sample 214</li> <li>● Special Situations 214</li> <li>● Use of Plasma vs Serum 215</li> </ul>
<b>21. Automated Complete Blood Cell Count</b>	<b>216</b>	<ul style="list-style-type: none"> <li>● Principles of Working of Hematology Analyzer 216</li> <li>● Data Presentation 218</li> <li>● Collection of Blood for Complete Blood Count 218</li> <li>● Parameters Measured by Hematology Analyzers 218</li> <li>● Flagging 221</li> <li>● Histograms 221</li> <li>● Causes of Erroneous Results on Automated CBC 223</li> <li>● Newer Parameters Available on Select Hematology Analyzers 223</li> <li>● Advantages of Hematology Analyzers 225</li> <li>● Limitations of Hematology Analyzers 225</li> <li>● Interpretation of Complete Blood Count 225</li> </ul>
<b>22. Estimation of Hemoglobin</b>	<b>227</b>	<ul style="list-style-type: none"> <li>● Indications for Hemoglobin Estimation 227</li> <li>● Methods for Estimation of Hemoglobin 227</li> <li>● General Remarks 230</li> </ul>

- 23. Packed Cell Volume 231**
- Uses of Packed Cell Volume 231
  - Macromethod (Wintrobe Method) 231
  - Micromethod 232
  - General Notes 233
- 24. Total Leukocyte Count 234**
- Manual Method 234
  - Automated Method 237
- 25. Reticulocyte Count 238**
- Uses 238
  - Method 239
- 26. Platelet Count 242**
- Manual Method 242
  - Automated Method 244
- 27. Blood Smear 245**
- Uses 245
  - Preparation of Blood Smear (Wedge Method) 245
  - Fixation of Blood Smear 246
  - Staining of Blood Smear 246
  - Examination of Blood Smear 248
- 28. Red Cell Indices 259**
- Uses of Red Cell Indices 259
  - Manual Methods 259
  - Automated Methods 260
- 29. Erythrocyte Sedimentation Rate 261**
- Stages of Erythrocyte Sedimentation Rate 261
  - Factors affecting Erythrocyte Sedimentation Rate 261
  - Significance of Erythrocyte Sedimentation Rate 261
  - Indications for Measurement of Erythrocyte Sedimentation Rate 262
  - Methods for Estimation of Erythrocyte Sedimentation Rate 262
  - Acute Phase Reactants 264
- 30. Examination of Bone Marrow 267**
- Normal Bone Marrow 267
  - Indications for Bone Marrow Examination 268
  - Contraindications 269
  - Sites for Bone Marrow Aspiration or Biopsy 269
  - Method 269
  - Complications of Bone Marrow Aspiration and/or Biopsy 271
  - Processing of Marrow Specimens 271
  - Examination of Marrow Specimens 271
- 31. Hematology of Infectious Diseases 275**
- Malaria 275
  - Lymphatic Filariasis 283
  - Visceral Leishmaniasis 286
  - Bacterial Infections 288
  - Dengue Fever (DF) and Dengue Hemorrhagic Fever (DHF) 289
  - Hematological Changes in HIV/AIDS 290
- 32. Laboratory Tests in Anemia 293**
- Classification of Anemias 293
  - Anemias due to Decreased Production of Red Blood Cells 293
  - Hereditary Disorders of Hemoglobin 301
  - Disorders of Red Cell Membrane 306
  - Glucose-6-Phosphate Dehydrogenase Deficiency 307
  - Immune Hemolytic Anemias 308
  - Paroxysmal Nocturnal Hemoglobinuria 312
  - Microangiopathic and Macroangiopathic Hemolytic Anemia 312
  - Hypersplenism 313
  - Acute Blood Loss Anemia 313
  - Approach to Diagnosis of Anemia 313
- 33. Laboratory Tests in Hematological Malignancies 325**
- Acute Leukemias 325
  - Myelodysplastic Syndromes 331
  - Myeloproliferative Neoplasms (MPN) 331
  - Mature B- and T-Cell Neoplasms 334
  - Plasma Cell Neoplasms 334
- 34. Laboratory Tests in Bleeding Disorders 340**
- Physiology of Hemostasis 340
  - Bleeding Disorders 344
  - Approach to the Diagnosis of Bleeding Disorders 349
- 35. Laboratory Tests in Thrombophilia 362**
- Inherited Thrombophilia 363
  - Acquired Thrombophilia 365
  - Association of Thrombophilia with Clinical Presentation 366
  - Tests for Thrombophilia 366
  - Indications for Thrombophilia Testing 367
  - Diagnosis of Thrombophilia 367
  - Diagnosis of Deep Venous Thrombosis 367
  - Diagnosis of Pulmonary Embolism 368
- 36. Laboratory Tests in Porphyrias 369**
- Introduction and Classification 369
  - Clinical Features 370
  - Laboratory Diagnosis 370
- 37. Flow Cytometry and Immunohistochemistry in Hematopathology 374**
- Flow Cytometry 374
  - Immunohistochemistry 380

<b>Section 3: Practical Blood Transfusion</b>	<b>383</b>	<b>44. Whole Blood, Blood Components and Blood Derivatives</b>	<b>420</b>
<b>38. Blood Group Systems</b>	<b>385</b>	<ul style="list-style-type: none"> <li>● Whole Blood 420</li> <li>● Blood Components 421</li> <li>● Plasma Components 423</li> <li>● Plasma Derivatives 424</li> <li>● Recombinant Factor Concentrates 424</li> </ul>	
<ul style="list-style-type: none"> <li>● ABO System 385</li> <li>● The Rh System 390</li> <li>● Other Blood Group Systems 393</li> </ul>		<b>45. Adverse Effects of Transfusion</b>	<b>425</b>
<b>39. Blood Grouping</b>	<b>394</b>	<ul style="list-style-type: none"> <li>● Acute Hemolytic Transfusion Reaction 425</li> <li>● Febrile Non-hemolytic Transfusion Reaction 426</li> <li>● Bacterial Contamination of Donor Unit 426</li> <li>● Transfusion-associated Lung Injury 426</li> <li>● Delayed Hemolytic Transfusion Reaction 426</li> <li>● Anaphylactic Reaction 427</li> <li>● Allergic Reaction 427</li> <li>● Transfusion-associated Circulatory Overload 427</li> <li>● Iron Overload (Transfusion Hemosiderosis) 427</li> <li>● Post-transfusion Purpura 427</li> <li>● Transmission of Infections 427</li> <li>● Transfusion-associated Graft-versus-Host Disease 428</li> <li>● Complications associated with Massive Transfusion 428</li> <li>● Recognition and Investigation of a Transfusion Reaction 428</li> </ul>	
<ul style="list-style-type: none"> <li>● ABO Grouping 394</li> <li>● Identical Blood versus Compatible Blood 398</li> <li>● RHD Grouping 398</li> </ul>		<b>Appendices</b>	<b>431</b>
<b>40. Collection of Donor Blood, Processing and Storage</b>	<b>400</b>	<ul style="list-style-type: none"> <li>● Types of Blood Donors 400</li> <li>● Criteria for Selection of Blood Donors 401</li> <li>● Collection of Donor Blood 403</li> <li>● Collection of Blood by Apheresis 404</li> <li>● Processing of Donor Blood 405</li> <li>● Autologous Donation 406</li> <li>● Directed Donation 406</li> <li>● Therapeutic Phlebotomy 407</li> </ul>	
<b>41. Screening Tests for Infections Transmissible by Transfusion</b>	<b>408</b>	<ul style="list-style-type: none"> <li>● Organisms Transmissible by Transfusion 408</li> <li>● Viruses 409</li> <li>● Bacteria 411</li> <li>● Parasites 411</li> <li>● Blood Donor Notification and Counseling 411</li> </ul>	
<b>42. Antibody Screening and Identification</b>	<b>413</b>	<ul style="list-style-type: none"> <li>● Appendix I: Association of Laboratory Test/Finding with Disease(s) or Condition(s) 433</li> <li>● Appendix II: Normal Reference Ranges in Adults 438</li> <li>● Appendix III: Critical Values 441</li> </ul>	
<ul style="list-style-type: none"> <li>● Antibody Screening 413</li> <li>● Antibody Identification 414</li> </ul>		<i>Index</i>	<b>443</b>
<b>43. Compatibility Test</b>	<b>416</b>		
<ul style="list-style-type: none"> <li>● Steps in Compatibility Testing 416</li> </ul>
