## Section 1 General Pathology

<b>Chapter 1: Introduction to Pathology</b>	<b>3</b>	<b>Chapter 4: Infections and Infestations</b>	<b>85</b>
❖ Role of a Pathologist in Diagnosis and Management of Disease 5		❖ Leprosy 85	
❖ History and Evolution of Pathology 8		❖ Syphilis 89	
<b>Chapter 2: Cell Injury and Adaptation</b>	<b>14</b>	❖ Tuberculosis 93	
❖ Types of Cellular Responses to Injury 14		❖ Bacterial Diseases 93	
❖ Cell Injury 14		❖ Viral Diseases 94	
❖ Types of Cell Injury 21		❖ Rickettsial Infections 96	
❖ Intracellular Accumulations 21		❖ Chlamydial Infections 97	
❖ Necrosis 27		❖ Fungal Infections and Opportunistic Infections 97	
❖ Apoptosis 33		❖ Mycetoma 100	
❖ Other Pathways of Cell Death 38		❖ Parasitic Diseases 101	
❖ Pathologic Calcification 38		❖ Malaria 101	
❖ Hyaline Change 40		❖ Other Infections 106	
❖ Mucoid Degeneration 40			
❖ Cellular Adaptations 41			
❖ Cellular Aging 45			
<b>Chapter 3: Inflammation and Healing</b>	<b>49</b>	<b>Chapter 5: Hemodynamic Disorders, Thromboembolism, and Shock</b>	<b>108</b>
❖ Inflammation 49		❖ Disorders of Perfusion 108	
❖ Recognition of Microbes and Damaged Cells 50		❖ Hemorrhage 111	
❖ Acute Inflammation 51		❖ Edema 112	
❖ Reactions of Blood Vessels (Vascular Changes) 51		❖ Normal Hemostasis 116	
❖ Leukocytic/Cellular Events 53		❖ Functions of Normal Endothelium 118	
❖ Chemical Mediators of Inflammation 59		❖ Thrombosis 120	
❖ Outcomes of Acute Inflammation 65		❖ Venous Thrombosis (Phlebothrombosis) 125	
❖ Morphological Types/Patterns of Acute Inflammation 67		❖ Embolism 127	
❖ Chronic Inflammation 68		❖ Pulmonary Embolism 127	
❖ Types of Chronic Inflammation 69		❖ Systemic Thromboembolism 128	
❖ Systemic Effects of Inflammation 71		❖ Fat and Marrow Embolism 129	
❖ Healing 73		❖ Air Embolism 130	
❖ Stem Cells 74		❖ Amniotic Fluid Embolism 131	
❖ Cell Cycle and Cell Proliferation 75		❖ Miscellaneous Pulmonary Emboli 132	
❖ Healing by Regeneration 77		❖ Infarction 132	
❖ Healing by Repair, Scar Formation and Fibrosis 77		❖ Shock 134	
❖ Cutaneous Wound Healing 79			
❖ Factors that Influence Wound Healing 81			
❖ Complications of Wound Healing 82			
		<b>Chapter 6: Immunopathology, AIDS, and Amyloidosis</b>	<b>142</b>
		❖ Immunity 142	
		❖ Cells of the Immune System 143	
		❖ Cytokines 147	
		❖ Hypersensitivity Reactions 147

Chapter 5: Hemodynamic Disorders, Thromboembolism, and Shock 108

❖ Disorders of Perfusion 108  
❖ Hemorrhage 111  
❖ Edema 112  
❖ Normal Hemostasis 116  
❖ Functions of Normal Endothelium 118  
❖ Thrombosis 120  
❖ Venous Thrombosis (Phlebothrombosis) 125  
❖ Embolism 127  
❖ Pulmonary Embolism 127  
❖ Systemic Thromboembolism 128  
❖ Fat and Marrow Embolism 129  
❖ Air Embolism 130  
❖ Amniotic Fluid Embolism 131  
❖ Miscellaneous Pulmonary Emboli 132  
❖ Infarction 132  
❖ Shock 134

Chapter 6: Immunopathology, AIDS, and Amyloidosis 142

❖ Immunity 142  
❖ Cells of the Immune System 143  
❖ Cytokines 147  
❖ Hypersensitivity Reactions 147

<ul style="list-style-type: none"> <li>❖ Type I (Immediate) Hypersensitivity Reactions 147</li> <li>❖ Antibody-mediated (Type II) Hypersensitivity Reactions 150</li> <li>❖ Immune Complex-mediated (Type III) Hypersensitivity Reactions 153</li> <li>❖ T-Cell Mediated (Type IV) Hypersensitivity Reactions 155</li> <li>❖ Autoimmune Diseases 157</li> <li>❖ Systemic Lupus Erythematosus 160</li> <li>❖ Other Autoimmune Disorders 166</li> <li>❖ Major Histocompatibility Complex Molecules 168</li> <li>❖ Rejection of Transplants 170</li> <li>❖ Immunodeficiency Syndromes 173</li> <li>❖ Acquired Immunodeficiency Syndrome 175</li> <li>❖ Amyloidosis 181</li> </ul> <p><b>Chapter 7: Neoplasia 187</b></p> <ul style="list-style-type: none"> <li>❖ Classification 187</li> <li>❖ Nomenclature of Neoplasms 188</li> <li>❖ Characteristics of Benign and Malignant Neoplasms 192</li> <li>❖ Dysplasia 197</li> <li>❖ Carcinoma In Situ 198</li> <li>❖ Metastasis 198</li> <li>❖ Invasion–Metastatic Cascade (Molecular Events in Invasion and Metastasis) 201</li> <li>❖ Environmental Factors and Cancer 203</li> <li>❖ Precancerous Conditions/Precursor Lesions 204</li> <li>❖ Genetic Lesions in Cancer 204</li> <li>❖ Molecular Basis of Cancer 206</li> <li>❖ Steps in Normal Cell Proliferation 207</li> <li>❖ Hallmarks of Cancer 207</li> <li>❖ Genomic Instability 221</li> <li>❖ Etiology of Cancer (Carcinogenic Agents) 222</li> <li>❖ Laboratory Diagnosis of Cancer 230</li> <li>❖ Clinical Aspects of Neoplasia 235</li> <li>❖ Paraneoplastic Syndromes 235</li> <li>❖ Prognosis 237</li> <li>❖ Examples of Benign Tumors 237</li> </ul>	<p><b>Chapter 8: Genetic and Pediatric Diseases 239</b></p> <ul style="list-style-type: none"> <li>❖ Genes 239</li> <li>❖ Classification of Genetic Disorders 240</li> <li>❖ Genetic Abnormalities 240</li> <li>❖ Mendelian Disorders/Single-Gene or Monogenic Disorders 242</li> <li>❖ Developmental Defects 244</li> <li>❖ Lyon Hypothesis 245</li> <li>❖ Demonstration of Sex Chromatin 245</li> <li>❖ Cytogenetics 245</li> <li>❖ Chromosomal Aberrations 247</li> <li>❖ Genomic Imprinting 248</li> <li>❖ Molecular Genetic Diagnosis 248</li> <li>❖ Storage Diseases 250</li> <li>❖ Cytogenetic Abnormalities and Mutations in Childhood 252</li> <li>❖ Tumors and Tumor-like Lesions of Infancy and Childhood 255</li> </ul> <p><b>Chapter 9: Environmental and Nutritional Diseases 257</b></p> <ul style="list-style-type: none"> <li>❖ Environmental Diseases 257</li> <li>❖ Effects of Tobacco 260</li> <li>❖ Effects of Alcohol 262</li> <li>❖ Protein–Energy Malnutrition 264</li> <li>❖ Starvation 264</li> <li>❖ Obesity 265</li> <li>❖ Common Vitamin Deficiencies 268</li> <li>❖ Fat-soluble Vitamins 268</li> <li>❖ Water-soluble Vitamins—Vitamin B Complex 272</li> </ul> <p><b>Chapter 10: Basic Diagnostic Cytology 275</b></p> <ul style="list-style-type: none"> <li>❖ Role (Uses) of Cytology 275</li> <li>❖ Methods for Obtaining Specimens 276</li> <li>❖ Techniques in Exfoliative Cytology 279</li> <li>❖ Fine Needle Aspiration Cytology 281</li> <li>❖ FNAC Appearance of Some Common Lesions 283</li> <li>❖ Other Cytology Techniques 284</li> </ul>

## Section 2 Hematology and Clinical Pathology

<p><b>Chapter 11: Introduction to Hematology and Disorders of Red Blood Cell 287</b></p> <ul style="list-style-type: none"> <li>❖ Hematopoiesis 287</li> </ul> <p><b>Anemia 290</b></p> <ul style="list-style-type: none"> <li>❖ Definition 290</li> </ul> <p><b>Anemias of Impaired Red Cell Production 293</b></p> <ul style="list-style-type: none"> <li>❖ Iron Deficiency Anemia 293</li> </ul>	<ul style="list-style-type: none"> <li>❖ Megaloblastic Anemia 297</li> <li>❖ Metabolism of Vitamin B<sub>12</sub> and Folic Acid 297</li> <li>❖ Pernicious Anemia 302</li> <li>❖ Aplastic Anemia 304</li> <li>❖ Hemolytic Anemias 305</li> <li>❖ Hereditary Spherocytosis 307</li> <li>❖ Glucose-6-Phosphate Dehydrogenase Deficiency 310</li> <li>❖ Hereditary Defects in Hemoglobin 311</li> </ul>
---	--

❖ Thalassemia Syndrome 311	❖ Follicular Lymphoma 356
❖ β-Thalassemia Major 311	❖ Diffuse Large B-cell Lymphoma 358
❖ β-Thalassemia Minor/Trait 314	❖ Burkitt Lymphoma 358
❖ α-Thalassemia 314	❖ Mature T-cell and NK Cell Neoplasms 359
<b>Sickle Cell Disease 316</b>	<b>Hodgkin Lymphomas 360</b>
❖ Sickle Cell Anemia 316	❖ Classical Hodgkin Lymphoma 361
❖ Sickle Cell Trait 320	❖ Nodular Lymphocyte Predominant Hodgkin Lymphoma 364
<b>Other Anemias 320</b>	❖ Etiology and Pathogenesis of Hodgkin Lymphoma 364
❖ Immunohemolytic Anemias 321	❖ Laboratory Findings 364
❖ Hemolytic Disease of the Newborn 321	❖ Splenomegaly 366
❖ Antiglobulin (Coombs) Test 322	❖ Clinical Scenario 367
❖ Autoimmune Hemolytic Anemia 323	
❖ Fragmentation Syndrome 324	
❖ Paroxysmal Nocturnal Hemoglobinuria 324	
❖ Anemias of Blood Loss 324	
❖ Sideroblastic Anemias 324	
❖ Approach to the Diagnosis of Hemolytic Anemia 325	
❖ Miscellaneous 326	
❖ Clinical Scenario 326	
<b>Chapter 12: Disorders of White Blood Cell, Lymph Node, and Spleen 328</b>	<b>Chapter 13: Disorders of Hemostasis 369</b>
<b>Quantitative and Qualitative Disorders of Leukocytes 328</b>	<b>Disorders of Primary Hemostasis 369</b>
❖ Normal Differential Leukocyte Count 328	❖ Normal Hemostasis 369
❖ Quantitative Disorders of Leukocytes 328	❖ Classification of Hemostatic Disorders 370
❖ Qualitative Disorders of Leukocytes 332	❖ Bleeding Disorders Caused by Vessel Wall Abnormalities 370
❖ Infectious Mononucleosis (Glandular Fever) 332	❖ Bleeding Disorders due to Abnormalities of Platelet 370
<b>Acute Leukemia 333</b>	❖ Thrombocytopenia 370
❖ Acute Lymphoblastic Leukemia/Lymphoma 336	❖ Immune Thrombocytopenic Purpura 371
❖ Acute Myelogenous Leukemia 338	❖ Thrombocytopenia 373
❖ Myeloid Sarcoma 339	❖ Qualitative Platelet Disorders 373
<b>Myelodysplastic Syndromes 340</b>	<b>Bleeding Disorders: Due to Abnormalities of Coagulation/Clotting Factor 373</b>
<b>Myeloproliferative Neoplasms 340</b>	❖ Classification of Coagulation Disorders 374
❖ Polycythemia or Erythrocytosis 341	❖ Hemophilia 374
❖ Polycythemia Vera 341	❖ Von Willebrand Disease 376
❖ Essential Thrombocythemia 343	❖ Acquired Coagulation Disorders 377
❖ Primary Myelofibrosis 343	❖ Disseminated Intravascular Coagulation 377
❖ Chronic Myelogenous Leukemia 344	<b>Thrombotic Disorders: Hypercoagulable State 379</b>
<b>Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma 346</b>	❖ Hypercoagulable State (Thrombophilia) 379
❖ Chronic Lymphocytic Leukemia 346	❖ Acquired Hypercoagulable States 380
❖ Hairy Cell Leukemia 348	
<b>Plasma Cell Neoplasms 348</b>	<b>Chapter 14: Clinical Pathology 381</b>
❖ Plasma Cell Myeloma (Multiple Myeloma) 349	❖ Anticoagulants 381
<b>Disorders of the Lymph Node 351</b>	❖ Blood Sample 382
❖ Normal Structure 351	❖ Hemoglobin Estimation 383
❖ Lymphadenitis 354	❖ Complete Blood Counts (Hemogram) 384
❖ Lymphoid Neoplasms 356	❖ Peripheral Blood Smear Examination 384
	❖ Reticulocyte Count 385
	❖ Hematocrit 386
	❖ Erythrocyte Sedimentation Rate 388
	❖ LE Cell Test 389
	❖ Bone Marrow Examination 389
	❖ Osmotic Fragility Test 390
	❖ Laboratory Evaluation of Hemostatic Disorders 391
	❖ Urine Analysis 393

- ❖ Body Fluids 402
- ❖ Pleural Fluid 402
- ❖ Peritoneal Fluid 404
- ❖ Cerebrospinal Fluid Examination 405
- ❖ Semen Analysis 406
- ❖ Sputum Examination 408
- ❖ Liver Function Tests 409
- ❖ Renal Function Tests 412
- ❖ Thyroid Function Tests 413
- ❖ Laboratory Values of Clinical Importance 415

## Chapter 15: Blood Banking and Transfusion 420

- ❖ Blood Group System 420
- ❖ Transfusion Medicine 422
- ❖ Pretransfusion and Compatibility Testing 423
- ❖ Transfusion-transmitted Diseases 426
- ❖ Adverse Transfusion Reactions 427
- ❖ Investigation (Work-up) of Suspected Adverse Transfusion Reactions 430
- ❖ Autologous Blood Donation and Transfusion 431

## Section 3 Systemic Pathology

### Chapter 16: Cardiovascular Disorders 435

#### Vascular Disorders 435

- ❖ Arteriosclerosis 435
- ❖ Atherosclerosis 435
- ❖ Aneurysms and Dissection 442
- ❖ Hypertensive Vascular Disease 445
- ❖ Vasculitis 448
- ❖ Vascular Tumors 451

#### Heart Disorders 453

- ❖ Heart Failure 453
- ❖ Ischemic Heart Disease 455
- ❖ Angina Pectoris 457
- ❖ Myocardial Infarction 458
- ❖ Infective Endocarditis 469
- ❖ Noninfected Vegetations 474
- ❖ Rheumatic Fever and Rheumatic Heart Disease 474
- ❖ Congenital Heart Disease 480
- ❖ Left-to-Right Shunts 481
- ❖ Right-to-Left Shunts 482
- ❖ Obstructive Congenital Anomalies 483
- ❖ Cardiomyopathy 484
- ❖ Pericardial Disease 488
- ❖ Pericarditis and Pericardial Effusion 488
- ❖ Cardiac Myxoma 492

### Chapter 17: Respiratory Disorders 493

- ❖ Obstructive Lung Diseases 493
- ❖ Emphysema 493
- ❖ Chronic Bronchitis 496
- ❖ Asthma 498
- ❖ Bronchiectasis 501
- ❖ Pulmonary Infections 503
- ❖ Pneumonia 504
- ❖ Community-acquired Acute Pneumonias 505

- ❖ Hospital-acquired Pneumonia 509
- ❖ Lung Abscess 509
- ❖ Tuberculosis 511
- ❖ Sarcoidosis 519

- ❖ Acute Lung Injury and Acute Respiratory Distress Syndrome (Diffuse Alveolar Damage) 520
- ❖ Atelectasis (Collapse) 521
- ❖ Pneumoconioses 522
- ❖ Lung Carcinomas 527
- ❖ Metastatic Tumors 536
- ❖ Pleural Tumor 537

### Chapter 18: Disorders of Oral Cavities and Gastrointestinal Tract 539

- ❖ Oral Cavity 539
- ❖ Precancerous Lesions of Oral Cavity 539
- ❖ Squamous Cell Carcinoma 540
- ❖ Salivary Gland Neoplasms 541
- ❖ Pleomorphic Adenoma 542
- ❖ Warthin Tumor 543
- ❖ Mucoepidermoid Carcinoma 544

#### Gastrointestinal Tract 545

- ❖ Esophagus 545
- ❖ Esophageal Cancer 546
- ❖ Stomach 548
- ❖ Acute Gastritis 549
- ❖ Mucosal Disease Related to Stress 549
- ❖ Chronic Gastritis 550
- ❖ Peptic Ulcer Disease 552
- ❖ Zollinger–Ellison Syndrome 556
- ❖ Gastric Adenocarcinoma 557
- ❖ Gastrointestinal Stromal Tumor 563
- ❖ Meckel Diverticulum 564
- ❖ Typhoid Fever 564
- ❖ Intestinal Tuberculosis 567
- ❖ Shigellosis–Bacillary Dysentery 568
- ❖ Amebiasis 569
- ❖ Carcinoid Tumor 571
- ❖ Inflammatory Bowel Disease 572
- ❖ Crohn Disease 576
- ❖ Ulcerative Colitis 578
- ❖ Intussusception 580
- ❖ Hirschsprung Disease 581
- ❖ Polyps of Colon 582
