Basic Sciences of Anatomy, Physiology Related to Genetics—I

MD Winter 2022

1

1. LAQ: Define the term “intellectual disability.” Describe the etiology, epidemiology, clinical manifestations, evaluation, and management of a child with intellectual disability 1
2. LAQ: Define the term “Severe Acute Malnutrition (SAM).” Describe the etiopathogenesis, clinical manifestations, investigations, management, complications and prevention of SAM.....4
3. SAQ: (any five out of six)
 - a. Hypernatremic dehydration8
 - b. High frequency ventilation8
 - c. Prenatal diagnosis of Wilson disease8
 - d. Enuresis (Bed-Wetting).....9
 - e. Rational drug use in pediatric practice9
 - f. Describe health supervision for children with Down syndrome9

MD Summer 2022

10

1. LAQ: Enumerate the autosomal dominant categories of disorders in children. Describe clinical features and management of congenital adrenal hyperplasia 10
2. LAQ: Describe the physiology and mechanism of formation of cerebrospinal fluid. Enumerate the causes of raised intracranial pressures and its management 12
3. SAQ: (any five out of six)
 - a. Pathophysiology of edema in nephrotic syndrome..... 12
 - b. Development of testes..... 12
 - c. Genetics of Edwards syndrome 15
 - d. Recurrent abdominal pain in childhood 16
 - e. Hypothyroidism..... 16
 - f. Cardiac cycle..... 16

DCH Summer 2022

17

1. LAQ: Define the term “poor scholastic performance (PSP).” Enumerate the causes of PSP in a 9-year-old child. Describe the approach to diagnosis, investigations, management, and prevention of PSP 17
2. LAQ: Define the term “shock.” Describe the etiopathogenesis, clinical manifestations, investigations, management, and prognosis of septic shock in children..... 17
3. SAQ: (any five out of six)
 - a. Kerosene poisoning 19
 - b. Glasgow Coma Scale (GCS)..... 20
 - c. Autosomal recessive inheritance 20
 - d. Craniosynostosis 20
 - e. Cleft lip and palate 21
 - f. Management and prevention of lactational failure 22

MD Summer 2021

23

1. LAQ: Explain the physiology of regulation of osmolality of plasma. Describe the etiology, clinical features, and management of syndrome of inappropriate secretion of antidiuretic hormone (SIADH) 23

2. LAQ: Describe the morphogenesis of the liver and biliary system. Evaluate the utility of various investigations used for differentiating between neonatal hepatitis and biliary atresia 24
3. SAQ: (any five out of six)
 - a. Describe the clinical features and management of Fragile X syndrome 24
 - b. Genetic counseling..... 24
 - c. Hyperkalemia: Enumerate the causes and describe the management 24
 - d. Laboratory diagnosis of homocystinuria (homocysteine)..... 24
 - e. Describe the role of zinc in health and disease..... 24
 - f. Peak expiratory flow monitoring..... 24

DCH Summer 2021**27**

1. LAQ: Describe the development of gastrointestinal tract. Discuss clinical features and management of infantile hypertrophic pyloric stenosis..... 27
2. LAQ: Discuss CSF circulation. Describe types, clinical features and management of various types of hydrocephalus in children 28
3. SAQ: (any five out of six)
 - a. Karyotyping 28
 - b. Anion gap 28
 - c. Physiology of thermoregulation in newborn 29
 - d. Trisomy 21..... 30
 - e. Vitamin D 30
 - f. Physiological changes in adolescence 30

MD Summer 2020**31**

1. LAQ: Describe the development of fetal heart in details. Describe the transition from fetal to neonatal circulation. Add note on interventional cardiac catheterization 31
2. LAQ: Discuss the physiology of hemostasis. Discuss the evaluation of child with bleeding/coagulation disorder 33
3. SAQ: (any five out of six)
 - a. Gene therapy 33
 - b. Hypokalemia..... 35
 - c. Neural tube defect..... 36
 - d. Clinical assessment of acid–base disorders..... 39
 - e. Progeria 40
 - f. Leukopenia..... 42

DCH Summer 2020**44**

1. LAQ: Describe the synthesis and physiological actions of thyroxine. Describe the clinical manifestations and management of congenital hypothyroidism..... 44
2. LAQ: Describe normal development of RBC. Discuss clinical features and management of sickle cell disease. Add a note on its genetic inheritance 45
3. SAQ: (any five out of six)
 - a. Autosomal recessive inheritance 47
 - b. Etiology and management of hyperkalemia 49
 - c. Monitoring the head circumference 50
 - d. Bronchogenic cyst: Origin, clinical manifestations, and management 51
 - e. Vitamin C in health and disease..... 52
 - f. Clinical manifestations and diagnosis of Klinefelter syndrome 52

MD Winter 2019**54**

1. LAQ: Describe development of gut. Discuss clinical features and management of various developmental disorders in newborn including malrotation of gut 54
2. LAQ: Describe the physiology of puberty. Define the term precocious puberty. Enumerate the conditions and approach to diagnosis, investigations, and management in a girl with precocious puberty..... 54

3. SAQ: (any five out of six)
 - a. Genetic counseling..... 54
 - b. Anion gap 56
 - c. Attention-deficit hyperactivity disorder (ADHD)..... 57
 - d. Pulmonary function tests..... 59
 - e. Transition from fetal circulation to neonatal circulation 61
 - f. Physiological anemia of infancy 61

DCH Winter 2019**63**

1. LAQ: Describe development of heart. Discuss types of congenital heart diseases 63
2. LAQ: Describe development of hepatobiliary system. Discuss differential diagnosis of jaundice in a 1-month-old baby 63
3. SAQ: (any five out of six)
 - a. Genetics of Down syndrome 63
 - b. Hypokalemia..... 63
 - c. Autosomal recessive disorders..... 63
 - d. Kangaroo mother care 64
 - e. Metabolic acidosis 64
 - f. Genetic counseling..... 65

MD Summer 2019**66**

1. LAQ: Describe the fetal circulation. Discuss the changes in circulation at birth. Outline approach to cyanosis in newborn baby 66
2. LAQ: Describe clinical features, cytogenetics, antenatal diagnosis, and management of trisomy 21 67
3. SAQ: (any five out of six)
 - a. Karyotyping 69
 - b. Liver function test 70
 - c. Sexual maturity rating in children 71
 - d. Fragile "X" syndrome 71
 - e. Neural tube defect..... 72
 - f. Anion gap 72

DCH Summer 2019**73**

1. LAQ: Describe the synthesis and physiological actions of thyroxine (T4). Describe the clinical manifestations and management of congenital hypothyroidism 73
2. LAQ: Describe the development of liver and hepatobiliary system. Discuss clinical features and management of biliary atresia..... 73
3. SAQ: (any five out of six)
 - a. Management of hyperkalemia..... 73
 - b. Facility-based dietary management of a child with severe acute malnutrition (SAM)..... 73
 - c. Gene therapy 74
 - d. Role of zinc in health and disease..... 74
 - e. Turner syndrome 74
 - f. Management of nutritional rickets..... 74

MD Winter 2018**75**

1. LAQ: Describe the fetal development and physiology of thyroid. Discuss etiologic classification and management of congenital hypothyroidism 75
2. LAQ: Describe "tyrosine" metabolism. Discuss the management of phenylketonuria in children 77
3. SAQ: (any five out of six)
 - a. Learning disability 77
 - b. Anion gap 77
 - c. Peripheral blood smear examination 77

d. Disseminated intravascular coagulation	79
e. Phototherapy.....	80
f. Pica.....	80

MD Summer 2018

82

1. LAQ: Describe the development of liver. Describe bilirubin metabolism and discuss approach to a 2-month-old infant with cholestasis.....	82
2. LAQ: Enumerate common poisonings in children. Discuss pathophysiology, clinical features, and management of a child with paracetamol overdose.....	86
3. SAQ: (any five out of six)	
a. Brain death.....	89
b. Epigenetics.....	93
c. Hypokalemia.....	94
d. Neurocutaneous markers.....	94
e. Growth velocity curve.....	96
f. Strategies to reduce infant mortality rate (IMR)	99

DCH Summer 2018

102

1. LAQ: Describe CSF circulation. Discuss the etiologies, clinical features, diagnosis, and management of congenital hydrocephalus.....	102
2. LAQ: Describe the pattern of inheritance of genetic diseases. Discuss multifactorial inheritance. Add a note on antenatal diagnosis.....	104
3. SAQ: (any five out of six)	
a. Otoacoustic emission.....	107
b. Changes in fetal circulation at birth.....	108
c. X-linked recessive disorders.....	109
d. Patent foramen ovale	110
e. Malrotation of gut.....	111
f. Hyponatremia	114

MD Summer 2017

116

1. LAQ: Describe the role of kidney in the maintenance of acid-base balance. Describe the clinical features and management of renal tubular acidosis (RTA).....	116
2. LAQ: Describe the physiology of lactation and composition of breastmilk. Explain the physiological basis and justification for feeding practices such as avoidance of prelacteal feeds, demand feeding, night feeding, exclusive breastfeeding, and rooming-in.....	119
3. SAQ: (any five out of six)	
a. Chelation therapy in thalassemia major.....	123
b. Fluorescent in situ hybridization (FISH)	123
c. Phenylketonuria	125
d. Mitochondrial inheritance.....	127
e. Thyroid function tests	128
f. Optimal health supervision for children with Down syndrome	129

MD Summer 2016

130

1. LAQ: Enumerate “neural tube defects.” Describe the prevention, clinical features, investigation, and management of lumbosacral meningocele.....	130
2. LAQ: Describe functions of platelets. Describe clinical features, investigations, and management of idiopathic thrombocytopenic purpura (ITP).....	130
3. SAQ: (any five out of six)	
a. Trisomy 18.....	133
b. Magnesium deficiency in children.....	134
c. Hazards of toys in children	137

d. Bowlegs	138
e. Side effects of antiretroviral therapy (ART).....	139
f. Hypernatremic dehydration	142

DCH Summer 2016**144**

1. LAQ: Describe development of interventricular septum. Describe clinical features, investigations, and management of a case of VSD.....	144
2. LAQ: Describe the SMR rating in a 12-year-old boy. Discuss problems of adolescents.....	149
3. SAQ: (any five out of six)	
a. Autosomal recessive disorders.....	151
b. Microcephaly	151
c. Modified Glasgow Coma Scale	152
d. Hypocalcemia.....	153
e. Development of kidneys	154
f. Vitamin A toxicity.....	157

MD Winter 2015**159**

1. LAQ: Enumerate the causes of immunodeficiency in childhood. Describe the clinical features and diagnostic approach of a child with suspected immunodeficiency	159
2. LAQ: What is epigenetics? Describe the mechanism and clinical implications of epigenetics	162
3. SAQ: (any five out of six)	
a. Hypernatremic dehydration	162
b. Hypophosphatemic rickets	162
c. Infant of diabetic mother	165
d. Immunization in adolescence	167
e. Genetics of Down syndrome and its clinical implications	169
f. Development of lungs	170

MD Summer 2015**174**

1. LAQ: Describe development of fetal urinary tract. Enumerate congenital anomalies of urinary tract. Describe clinical features, investigations, and management of posterior urethral valves.....	174
2. LAQ: Describe the physiology of puberty. Enumerate the conditions causing precocious puberty. Outline clinical manifestation, laboratory finding, and treatment of precocious puberty	179
3. SAQ: (any five out of six)	
a. Stem cell transplant	179
b. Neural tube defect.....	180
c. Genetic counseling.....	180
d. Fragile X syndrome.....	180
e. Anion gap	180
f. Hypokalemia.....	180

DCH Winter 2014**181**

1. LAQ: Describe physiology of puberty and discuss approach and management of a 7-year-old child presenting with precocious puberty	181
2. LAQ: Describe the physiology of urine formation and discuss the metabolic function of kidney.....	186
3. SAQ: (any five out of six)	
a. SIADH (syndrome of inappropriate secretion of ADH).....	192
b. Aerosol therapy in asthma.....	193
c. Approach to diagnosis of a 1-month-old infant born to HIV positive mother	195
d. Tools of assessment of growth and development at various ages	197
e. Turner syndrome.....	200
f. Midazolam.....	202

MD Summer 2014 **204**

1. LAQ: Describe cerebrospinal fluid circulation. Describe clinical features, investigation, management, and complications of hydrocephalus in a 2-year-old child.....204
2. LAQ: Describe mechanism of coagulation of blood, clinical features, and management of von Willebrand disease206
3. SAQ: (any five out of six)
 - a. Trisomy 21209
 - b. Zinc in therapy209
 - c. Management of nuclear radiation injury210
 - d. Gene therapy212
 - e. Adverse effects of antitubercular drugs212
 - f. Oral rehydration solution214

Solved Paper—I 1–18 Questions **216**

1. Metabolic alkalosis216
2. Vitamin E218
3. G6PD deficiency219
4. Antidiuretic hormone221
5. Hypoglycemia223
6. Micronutrients.....225
7. Myasthenia gravis227
8. Patau syndrome.....228
9. Nutritional rehabilitation center.....229
10. Clinical manifestations, diagnosis (including differential diagnosis), and management of hypervitaminosis D230
11. Prader–Willi syndrome231
12. Development of pancreas.....232
13. Describe the embryonic development of placenta.....235
14. Genetics and congenital heart diseases236
15. Hypospadias237
16. Development of nervous system239
17. Leukocyte adhesion deficiency241
18. Describe clinical features and management of thalassemia major242

Neonatology, Social Sciences Related to Pediatrics—II**MD Winter 2022** **246**

1. LAQ: Define the term “hypoxic-ischemic encephalopathy” in a neonate. Describe the etiology, pathophysiology, clinical manifestations, diagnosis, treatment, and prognosis of neonatal hypoxic-ischemic encephalopathy246
2. LAQ: Describe the etiology, clinical manifestations, laboratory findings, differential diagnosis, treatment, and prevention of iron-deficiency anemia in children246
3. SAQ: (any five out of six)
 - a. Specific learning disabilities.....248
 - b. Immunizations in an adolescent249
 - c. Prevention and management of lactation failure249
 - d. Rashtriya Bal Swasthya Karyakram (RBSK)249
 - e. Adoption rules and regulations in India249
 - f. TORCH infections in newborn249

DCH Winter 2022 **252**

1. LAQ: Describe the pathophysiology of birth asphyxia. Discuss the management of an extremely preterm neonate measuring 900 g, who is asphyxiated at birth.....252
2. LAQ: Discuss distinguishing features of facility-based integrated management of neonatal and childhood illnesses (f-IMNCI). Discuss approach to management of a child presented with fever as per f-IMNCI guidelines252

3. SAQ: (any five out of six)
 - a. Kangaroo mother care (KMC) 253
 - b. Bullous eruptions in newborn 254
 - c. Antenatally detected hydronephrosis management 255
 - d. Adolescent's health problems 256
 - e. Nutritional recovery syndrome 256
 - f. Outline setting up of an NICU in a district hospital 257

MD Summer 2022**259**

1. LAQ: Enumerate the etiology, clinical features, investigations, and management of birth asphyxia in a neonate 259
2. LAQ: Discuss differential diagnosis and management of respiratory distress in newborn 259
3. SAQ: (any five out of six)
 - a. Health consequences of childhood obesity 260
 - b. Fire accidents in neonatal nursery 261
 - c. Laboratory evaluation of a baby with polycythemia 262
 - d. Persistent pulmonary hypertension in neonate 262
 - e. Reflexes involved in lactation 262
 - f. Baby-friendly hospital 262

MD Summer 2021**263**

1. LAQ: Define the term "premature birth". Describe the incidence, etiopathogenesis, clinical assessment, management, complications, and sequelae in a preterm baby 263
2. LAQ: Define the terms "child abuse" and "child neglect". Describe the various types of child abuse and neglect, its etiopathogenesis, clinical manifestations, investigations, management, and prevention 265
3. SAQ: (any five out of six)
 - a. Neonatal thrombocytopenia 268
 - b. Right to Education Act (RTE) 270
 - c. Twin delivery 271
 - d. Congenital diaphragmatic hernia 273
 - e. Principles for the prevention of nosocomial infection in the neonatal intensive care unit (NICU) 273
 - f. Varicella during neonatal period 273

DCH Summer 2021**275**

1. LAQ: Enumerate causes of respiratory distress in a newborn baby. Discuss clinical features and management of hyaline membrane disease 275
2. LAQ: Describe clinical features, investigations, management, and prevention of necrotizing enterocolitis in newborn 275
3. SAQ: (any five out of six)
 - a. Umbilical cord examination 275
 - b. Low milk production 276
 - c. Retinopathy of prematurity 279
 - d. Infant mortality rate 279
 - e. School health program 279
 - f. Baby-friendly hospital initiative 281

MD Summer 2020**282**

1. LAQ: Discuss the pathophysiology, clinical features, and management of periventricular and intraventricular hemorrhage in preterm newborns 282
2. LAQ: Discuss Integrated Management of Neonatal and Childhood Illness (IMNCI) 284
3. SAQ: (any five out of six)
 - a. PPTCT 286
 - b. Management of a bleeding neonate 287
 - c. Nonimmune hydrops fetalis 289

d. Complications of ventilatory support in a newborn	291
e. Nocturnal enuresis	291
f. Neonatal seizures.....	293

DCH Summer 2020**294**

1. LAQ: Describe clinical features, investigations, management, and complications in a newborn with early onset sepsis . . .	294
2. LAQ: Outline the components of ICDS program. Briefly discuss its impact on child health in India. Add a short note on causes for its failure	294
3. SAQ: (any five out of six)	
a. Phototherapy.....	295
b. Prevention of hypothermia in a newborn.....	295
c. Current status of polio eradication.....	295
d. Rashtriya Bal Swasthya Karyakram (RBSK)	296
e. Human Milk Bank.....	296
f. Clinical features and management of hypoglycemia in a newborn	296

MD Winter 2019**297**

1. LAQ: Describe in detail the etiology, clinical features, and management of hypoglycemia in a neonate. Add a note on persistent hypoglycemia in infants.....	297
2. LAQ: Describe the etiology, pathogenesis, clinical features, diagnosis, and treatment of dyslexia.....	297
3. SAQ: (any five out of six)	
a. Hematuria in newborn.....	299
b. Baby-friendly hospital	299
c. Kangaroo mother care	300
d. Child sexual abuse	301
e. Encopresis.....	303
f. Mechanical ventilation in respiratory distress syndrome.....	304

DCH Winter 2019**305**

1. LAQ: Discuss etiology, pathophysiology, clinical features, and management of persistent pulmonary hypertension in the newborn.....	305
2. LAQ: Describe the psychosocial problems in adolescence and their management	307
3. SAQ: (any five out of six)	
a. Learning disabilities	307
b. Child abuse.....	307
c. Management of bleeding in neonate	307
d. Neonatal seizures.....	307
e. Prevention of hospital acquired infections.....	308
f. Mid-day school meal program.....	309

MD Summer 2019**310**

1. LAQ: A full-term neonate develops the convulsion on day 2 of life. Enumerate the possible etiologies and discuss the management of neonatal seizures.....	310
2. LAQ: Enumerate the causes of bleeding in a newborn. Describe the clinical features and management of hemorrhagic disease of a newborn. Add a short note on its prevention.....	314
3. SAQ: (any five out of six)	
a. Role of pediatrician in adoption.....	316
b. Child physical abuse	317
c. Surfactant therapy.....	317
d. National child health policies	317
e. IMNCI (Integrated Management of Neonatal and Childhood Illness)	318
f. Effect of maternal medication on fetus	318

DCH Summer 2019	320
1. LAQ: Define hypoglycemia in the newborn. Enumerate the causes and describe the management of hypoglycemia in the neonatal period	320
2. LAQ: Enumerate causes of respiratory distress. Describe the etiology, clinical manifestations, prevention, and management of hyaline membrane disease (HMD).....	320
3. SAQ: (any five out of six)	
a. Preadoption assessment of a child.....	320
b. Assessment of gestational age at birth.....	320
c. Prevention of hospital-acquired infection in the neonatal intensive care unit (NICU).....	321
d. Kangaroo mother care (KMC)	321
e. Phototherapy.....	321
f. Nonaccidental injuries in children	321
MD Winter 2018	322
1. LAQ: Describe development of foregut. Discuss management of a 2-day-old neonate presenting with vomiting and abdominal distension	322
2. LAQ: A 7-year-old child presents with scholastic backwardness. Discuss approach and management.....	325
3. SAQ: (any five out of six)	
a. Dog bite.....	325
b. Combination vaccines.....	327
c. Human milk bank.....	328
d. Palliative care in children.....	328
e. Adolescent psychiatric disorders	328
f. Management of obesity	330
MD Summer 2018	332
1. LAQ: Discuss common learning problems in school children	332
2. LAQ: Discuss clinical approach and management of neonatal seizures.....	336
3. SAQ: (any five out of six)	
a. Neonatal metabolic screening	336
b. Assessment of fetal wellbeing.....	338
c. Prevention of birth asphyxia.....	340
d. Retinopathy of prematurity.....	341
e. Child sexual abuse	345
f. Autism.....	345
DCH Summer 2018	349
1. LAQ: Describe etiology of jaundice in a newborn child. Describe approach to diagnosis of neonatal jaundice and its management	349
2. LAQ: Enumerate risk factors for neonatal sepsis. Describe clinical features, investigations, and management of neonatal sepsis	352
3. SAQ: (any five out of six)	
a. Hemorrhagic disease of the newborn.....	354
b. Infant of diabetic mother	354
c. Role of pediatrician in child adoption	354
d. Ready-to-use therapeutic food (RUTF).....	354
e. Play therapy	355
f. Advantages of breastfeeding	358
MD Summer 2017	359
1. LAQ: Pathophysiology of hyaline membrane disease. Discuss prevention and management of hyaline membrane disease	359
2. LAQ: Describe learning disabilities in children. Discuss approach to a child with scholastic backwardness.....	361

3. SAQ: (any five out of six)
 - a. RBSK: Child health screening and early intervention services 362
 - b. Biomedical waste management..... 364
 - c. Congenital diaphragmatic hernia..... 366
 - d. Feeding low birthweight babies 368
 - e. Osteopenia of prematurity 368
 - f. Use of CPAP in NICU 370

MD Summer 2016**372**

1. LAQ: Describe the pathophysiology, clinical features, prevention, and management of necrotizing enterocolitis (NEC) in newborn babies..... 372
2. LAQ: A 20-day-old infant is found to have jaundice. Enumerate the causes and describe the evaluation undertaken to determine the cause of jaundice..... 374
3. SAQ: (any five out of six)
 - a. Strategies for preventing nosocomial infections in the neonatal intensive care unit (NICU) 375
 - b. Mass newborn screening 377
 - c. Effects of maternal medications on the fetus..... 377
 - d. Prevention and management of child sexual abuse: Role of a pediatrician 377
 - e. Substance abuse in adolescence 378
 - f. Healthcare delivery to children of migrant workers..... 379

DCH Summer 2016**381**

1. LAQ: Describe the etiology, classification, and management of neonatal seizures 381
2. LAQ: Describe the assessment of gestational age at birth and problems of low birthweight (LBW) babies on the first day of life..... 381
3. SAQ: (any five out of six)
 - a. Role of a pediatrician in the prevention of injuries in children 384
 - b. Phototherapy..... 385
 - c. Polycythemia in the newborn 385
 - d. Nocturnal enuresis 386
 - e. Problems of adolescent pregnancies 386
 - f. Congenital syphilis 387

MD Winter 2015**389**

1. LAQ: Discuss etiology, clinical features, investigations, and management of hypertension in children 389
2. LAQ: Define acute seizures. Discuss etiology and pathophysiology of acute seizures. Describe the management of a child with status epilepticus..... 392
3. SAQ: (any five out of six)
 - a. Down syndrome..... 394
 - b. Ready to use therapeutic food (RUTF)..... 395
 - c. Neonatal transport..... 395
 - d. Neurogenic bladder..... 396
 - e. Folic acid..... 399
 - f. Pertussis vaccine 401

MD Summer 2015**404**

1. LAQ: Describe the etiology, pathophysiology, clinical manifestations, and management of hypoxic-ischemic encephalopathy..... 404
2. LAQ: A 6-day-old baby is brought with the complaints of aversion to feeds and vomiting. Enumerate the possible causes and describe the approach to diagnosis 408
3. SAQ: (any five out of six)
 - a. Umbilical catheterization..... 409
 - b. Management of congenital diaphragmatic hernia in the neonatal period..... 411

c. Antibiotic policy for the neonatal intensive care unit (NICU)	411
d. Describe a pediatrician role in the assessment and management of a child with suspected sexual abuse	412
e. Write a note on stuttering.....	412
f. Impact of television on children.....	414

MD Summer 2014**416**

1. LAQ: What medical emergencies can you come across in the labor room in a neonate? How will you approach a case of neonatal anemia? Write in detail about etiopathogenesis, clinical features, and treatment of Rh incompatibilities	416
2. LAQ: Discuss the problems faced by children in a flood-affected area. What is near-drowning? Enumerate the rights of children	419
3. SAQ: (any five out of six)	
a. Feeding in a premature baby	422
b. Hypernatremia	423
c. Immunization in immunocompromised	425
d. Neonatal resuscitation	427
e. Delayed puberty.....	429
f. Adoption	432

Solved Paper—II 1–47 Questions**434**

1. Complementary feeding	435
2. Neonatal hypothermia.....	436
3. Child guidance clinic.....	438
4. Munchausen syndrome by proxy.....	439
5. Approach to common rashes in a newborn.....	440
6. Transient tachypnea of newborn	442
7. Hookworm infestation	444
8. Under-five clinic.....	445
9. Apnea of prematurity	446
10. Kernicterus.....	447
11. Intrauterine growth restriction/retardation	449
12. Exchange transfusion	451
13. Human milk fortifier	452
14. Thermoneutral environment	453
15. Warm chain	454
16. Tracheoesophageal fistula.....	455
17. OPV.....	456
18. BCG.....	457
19. Hepatitis B vaccine.....	458
20. Pneumococcal vaccine.....	458
21. Hib vaccine	459
22. Influenza vaccine.....	459
23. Ayushman Bharat Programme	460
24. India Newborn Action Plan	462
25. Rashtriya Kishor Swasthya Karyakram.....	463
26. Kishori Shakti Yojana	465
27. ARSH Programme.....	466
28. Mother's Absolute Affection Programme.....	466
29. Anemia Mukta Bharat Programme.....	467
30. LaQshya initiative.....	468
31. Open vial policy and vaccine vial monitor.....	469
32. Typhoid vaccine.....	470
33. Yellow fever vaccine.....	471

34. Measles vaccine	471
35. Hepatitis A vaccine	472
36. Varicella vaccine	472
37. Anorectal malformations	473
38. POCSO Act	475
39. Pradhan Mantri Matru Vandana Yojana.....	475
40. Sustainable development goals	476
41. Weaning from ventilator	477
42. Neonatal reflexes.....	477
43. Normal motor development in first year of life.....	478
44. Delivery room care of a normal newborn	479
45. <i>Enterobius vermicularis</i> infection	480
46. Newer antimalarials.....	481
47. Lactose intolerance	483

**Systemic Diseases in Pediatrics: Respiratory, Cardiology, CVS, Neurology,
Hematology, Nephrology, Rheumatology, Immunology, Metabolic,
Gastroenterology, Growth and Development, Congenital and Acquired Disorders of Ear,
Nose, Throat and Joints, Endocrine System, and Miscellaneous Diseases—III**

MD Summer 2021**485**

1. LAQ: A 1-year-old child is found to be severely pale with hepatosplenomegaly. Discuss differential diagnosis and management..... 485
2. LAQ: Discuss approach to a 5-year-old child with cyanosis and clubbing..... 486
3. SAQ: (any five out of six)
 - a. Lump in abdomen..... 486
 - b. Large head in a 1-year-old child..... 488
 - c. Pleural effusion..... 489
 - d. West Syndrome..... 490
 - e. Pancarditis..... 491
 - f. Inhalation therapy in Asthma..... 491

MD Winter 2022**492**

1. LAQ: Enumerate the organisms causing bacterial meningitis in children. Describe pathophysiology, clinical features, diagnosis, and management of meningoencephalitis in children..... 492
2. LAQ: Discuss hypertension in children. Discuss etiology, pathophysiology, clinical features, and management of hypertension in children..... 492
3. SAQ: (any five out of six)
 - a. Clinical features and management of celiac disease..... 493
 - b. Management of episode of acute severe asthma in a 6-year-old child..... 495
 - c. Approach to a 10-year-old boy presenting with sudden onset of hematuria..... 495
 - d. Discuss etiology, clinical features, and management of encopresis..... 495
 - e. Principles of hospital management of severe acute malnutrition..... 495
 - f. Clinical features and management of atopic dermatitis..... 495

DCH Winter 2022**496**

1. LAQ: Write classification of hemolytic anemias. Describe in detail clinical features, diagnosis, and management of sickle cell anemia. Add a note on HPLC in Hemoglobinopathies..... 496
2. LAQ: Discuss differential diagnosis of a 5-year-old baby resenting with acute onset of altered sensorium. Describe in brief various modalities for treatment of raised intracranial tension. Add a note on management of neurotuberculosis..... 498

3. SAQ: (any five out of six)
 - a. Diagnostic approach to renal tubular acidosis500
 - b. Management of tumor lysis syndrome.....500
 - c. Discuss in brief approach to a 2-month-old baby presenting with fever for 4 days without focus.....500
 - d. Gastroesophageal reflux disease in infants: Clinical features and management.....500
 - e. Management of cyanotic spells.....502
 - f. Clinical features and management of neonatal hypothyroidism.....503

MD Summer 2022**504**

1. LAQ: What is SIRS (systemic inflammatory response syndrome)? Enumerate the causes. Discuss pathophysiology and management of septic shock.....504
2. LAQ: Discuss pathogenesis, clinical features, diagnosis, and management of neurotuberculosis.....504
3. SAQ: (any five out of six)
 - a. Demineralizing bone diseases504
 - b. Portal hypertension in sickle cell patient505
 - c. Opportunistic infections in HIV-infected children505
 - d. Management of resistant malaria.....505
 - e. Toxic epidermal necrolysis.....505
 - f. Antiphospholipid syndrome.....506

DCH Summer 2021**508**

1. LAQ: Enumerate causes of pyrexia of unknown origin in children. Describe clinical features, investigations, complications, and management of enteric fever. Add a note on its prevention.....508
2. LAQ: Enumerate causes of shock in children. Discuss etiology, pathophysiology, and clinical features of cardiogenic shock. Add a note on management of cardiogenic shock.....508
3. SAQ: (any five out of six)
 - a. Cutaneous fungal infections.....510
 - b. Differential diagnosis of floppy infant.....511
 - c. Steroid-resistant nephrotic syndrome511
 - d. White patch on tonsils511
 - e. Pediatric palliative care512
 - f. Fate of primary complex512

MD Summer 2020**514**

1. LAQ: A 3-year-old boy presents with chronic cough. Enumerate the possible causes and discuss the differential diagnosis and evaluation plan to determine the cause.....514
2. LAQ: Enumerate the causes of chronic liver disease in children. Describe the clinical manifestations, diagnostic approach, and management of a child liver disease517
3. SAQ: (any five out of six)
 - a. Management of idiopathic (autoimmune) thrombocytopenic purpura.....517
 - b. Epilepsy surgery in children.....517
 - c. Management of a child with tachyarrhythmia.....518
 - d. Intussusception: Clinical features and management.....518
 - e. Noninvasive ventilation.....519
 - f. Atopic dermatitis.....521

DCH Summer 2020**522**

1. LAQ: A 2-year-old boy presents with chronic cough. Enumerate the possible causes. Describe the management of cystic fibrosis522
2. LAQ: Discuss the diagnostic approach in a child with recurrent abdominal pain.....525
3. SAQ: (any five out of six)
 - a. Role of LFT's in evaluation of childhood disease.....526
 - b. Vitamin D resistant rickets526

c. Hypokalemia.....	526
d. MAC-importance and drawbacks	526
e. DDH (development dysplasia of hip).....	527
f. Scabies	527

MD Winter 2019

529

1. LAQ: Describe the clinical features, differential diagnosis, and management of dengue infection in children	529
2. LAQ: Describe the etiology, differential diagnosis, and management of recurrent fainting episodes in a 7-year-old girl.....	529
3. SAQ: (any five out of six)	
a. Describe the clinical manifestations and management of neuroblastoma	532
b. Randomization in pediatric clinical trials	533
c. Investigations in prolonged infantile cholestasis.....	534
d. Rotavirus vaccine	534
e. Describe the diagnosis and management of steroid resistant nephrotic syndrome.....	534
f. Bronchial asthma: Devices for the delivery of inhalational drugs.....	534

DCH Winter 2019

535

1. LAQ: Enumerate causes of proteinuria in children. Describe etiopathogenesis, pathophysiology, clinical features, and management of child with idiopathic nephrotic syndrome. Add a note on its complications.....	535
2. LAQ: Describe etiology, pathophysiology, clinical features, and management of a 1-year-old child with acute bacterial meningitis	537
3. SAQ: (any five out of six)	
a. Second-line ART	538
b. Idiopathic thrombocytopenic purpura.....	539
c. Status asthmaticus	539
d. Croup syndrome.....	541
e. Hydroxyurea therapy for sickle cell disease	541
f. Juvenile hypothyroidism.....	542

MD Summer 2019

544

1. LAQ: Write approach to a child with polyarthritis. Write in detail about clinical features and management of systemic onset JRA. Add a note on macrophage activation syndrome.....	544
2. LAQ: Discuss approach to child with hematemesis. Write clinical features and management of extrahepatic portal hypertension. Add a note on liver transplantation	548
3. SAQ: (any five out of six)	
a. Congenital dislocation of hip	551
b. Management of tumor lysis syndrome	552
c. Recent advances in management of bronchiolitis	552
d. Treatment of intractable congestive cardiac failure.....	552
e. Iron chelation therapy.....	552
f. Pseudohypoparathyroidism.....	552

DCH Summer 2019

553

1. LAQ: Enumerate causes of anemia in children. Discuss etiopathogenesis, clinical features, and management of acute autoimmune hemolytic anemia	553
2. LAQ: Discuss causes of portal hypertension in children. What are its signs and symptoms? How will you diagnose and manage such a case?.....	555
3. SAQ: (any five out of six)	
a. Hemolytic uremic syndrome	557
b. Stevens–Johnson syndrome.....	557
c. IPV vaccine.....	559
d. Complications of malaria	559

- e. Vasculotoxic snake bite.....560
- f. Congenital dislocation of hip560

MD Winter 2018 561

1. LAQ: Discuss approach to a child with upper airway obstruction561
2. LAQ: Define febrile seizures in children. Discuss etiology, clinical features, investigations, and management of a typical febrile564
3. SAQ: (any five out of six)
 - a. Methodology of blood collection for blood culture and interpretation of blood culture reports.....567
 - b. Rubella vaccine568
 - c. Ventricular septal defect569
 - d. Dermatological manifestations in a child with immunodeficiency.....572
 - e. Child adoption573
 - f. Management of button battery ingestion.....573

MD Summer 2018 574

1. LAQ: Describe the etiology and pathogenesis of childhood asthma. Describe assessment of asthma severity and key-elements of optimum outpatient management of childhood asthma574
2. LAQ: Describe the etiopathogenesis, clinical features, diagnosis, management, complications, and prevention of typhoid fever in children.....575
3. SAQ: (any five out of six)
 - a. Acute febrile encephalopathy578
 - b. Autoimmune hepatitis.....582
 - c. Neurocysticercosis.....584
 - d. Steroid resistance nephrotic syndrome.....586
 - e. Drug therapy of congestive cardiac failure587
 - f. Snake-bite poisoning590

DCH Summer 2018 595

1. LAQ: Classify congenital heart diseases. Write in details about types, clinical features, and management of a child with interventricular septal defect. Add a note on the complications595
2. LAQ: Enumerate causes of respiratory distress in newborn. Discuss clinical features and management of respiratory distress syndrome in newborn.....596
3. SAQ: (any five out of six)
 - a. Febrile seizures597
 - b. Bronchiolitis597
 - c. Secondary sexual characters599
 - d. Toxic shock syndrome.....600
 - e. Opportunistic infections in HIV.....601
 - f. Reye's syndrome.....603

MD Summer 2017 605

1. LAQ: Define pyrexia of unknown origin (PUO). Enumerate causes of PUO. Discuss approach to a 6-year-old child with PUO605
2. LAQ: A 10-year-old child has come with focal convulsions for the first time. Discuss differential diagnosis and management of focal seizures in this child.....608
3. SAQ: (any five out of six)
 - a. Therapeutic uses of vitamin C609
 - b. SIDS611
 - c. Pulmonary function tests.....613
 - d. Precocious puberty613
 - e. Pathophysiology and management of HUS.....613
 - f. Management of chronic renal failure613

MD Summer 2016	616
1. LAQ: Discuss the differential diagnosis and approach to management of a child presented with coarse facies.....	616
2. LAQ: Describe normal tubular functions of kidney and discuss approach to a child age 2 years and weight 10 kg with proximal tubular acidosis	618
3. SAQ: (any five out of six)	
a. Stepwise therapy in a 3-year-old child weighs 10 kg presented with raised intracranial pressure	619
b. Hypernatremic dehydration	619
c. Genitourinary imaging techniques and their applications	619
d. Risk stratification in acute lymphoblastic leukemia.....	621
e. Approach to a child with recurrent pneumonia.....	622
f. Hepatic venous outflow obstruction.....	624
DCH Summer 2016	627
1. LAQ: Enumerate the causes of cholestasis in an infant. Describe the clinical manifestations, approach to diagnosis, and management of an infant presenting with cholestasis	627
2. LAQ: Enumerate the histologic types of idiopathic nephrotic syndrome. Describe the diagnosis, management, and complications of nephrotic syndrome	630
3. SAQ: (any five out of six)	627
a. Diagnosis and management of acute rheumatic carditis	633
b. Congenital hypothyroidism	634
c. Acute disseminated encephalomyelitis (ADEM).....	636
d. Status epilepticus.....	637
e. Clinical manifestations and management of Henoch–Schönlein purpura (HSP).....	640
f. Attention-deficit hyperactivity disorder (ADHD).....	640
MD Summer 2015	641
1. LAQ: Describe clinical features, complications, and management of acute viral myocarditis in a 1-year-old child	641
2. LAQ: Discuss diagnostic approach in a child with resistant rickets	642
3. SAQ: (any five out of six)	
a. Dyslexia.....	645
b. Subcutaneous vaccines	645
c. Osteogenesis imperfecta	646
d. Management of scorpion bite.....	648
e. Allergic rhinitis	649
f. Megaloblastic anemia	651
MD Winter 2014	653
1. LAQ: Describe etiology, clinical features, investigations, and management in a child with phenylketonuria	653
2. LAQ: Discuss causes and management of chronic liver disease	653
3. SAQ: (any five out of six)	
a. Ventilator-associated pneumonia.....	655
b. Vitamin D and management of rickets	657
c. Causes of discolored urine.....	659
d. Hypernatremic dehydration	660
e. Differential diagnosis of acute flaccid paralysis	660
f. Fiberoptic bronchoscopy	662
MD Summer 2014	664
1. LAQ: Discuss approach to a 5-year-old male child with recurrent wheezing. Write in detail on grades and management of bronchial asthma	664
2. LAQ: Define diabetic ketoacidosis. Describe in detail the clinical features, diagnosis, management, and complications of diabetic ketoacidosis.....	670

3. SAQ: (any five out of six)	
a. Duchenne muscular dystrophy	672
b. Albright hereditary osteodystrophy	674
c. Role of zinc in pediatrics.....	675
d. Management of vesicoureteral reflux	675
e. Iron poisoning.....	677
f. Atopic dermatitis.....	678

Solved Paper—III 1–33 Questions

681

1. Measles	682
2. Poliomyelitis.....	685
3. Cerebral palsy.....	689
4. Undescended testis.....	692
5. Urinary tract infection	695
6. Tic disorders	698
7. Temper tantrums and breath-holding spells	700
8. Describe approach to hypotonia. What is benign congenital hypotonia?.....	701
9. Guillain–Barré syndrome	703
10. Transverse myelitis.....	706
11. Dengue fever	707
12. Leptospirosis.....	713
13. Clinical manifestations, diagnosis, and management of infective endocarditis.....	714
14. Acute otitis media.....	717
15. Pediculosis.....	718
16. Leukemoid reaction	720
17. Non-Hodgkin's lymphoma.....	721
18. Zika virus	722
19. Nipah virus infection.....	723
20. Acute rheumatic fever	724
21. Cretinism	727
22. Congenital megacolon	728
23. Treatment of drug-sensitive TB.....	730
24. Treatment of malaria.....	731
25. Sexual education in adolescents	732
26. Urticaria	733
27. Obstructive sleep apnea syndrome	735
28. Enumerate causes of hematuria in children. Discuss etiopathogenesis, clinical features, laboratory diagnosis, and management of acute glomerulonephritis	737
29. Clubbing.....	739
30. Cyanosis.....	740
31. Management of anaphylaxis	741
32. Viral hepatitis	742
33. Cerebrospinal fluid examination	742

Recent Advances in Pediatrics—IV

MD Winter 2022

744

1. LAQ: Enumerate the causes of CCF (congestive cardiac failure) in a newborn. Describe the clinical features, investigation, and management of cardiogenic shock in a newborn baby	744
2. LAQ: Enumerate hemoglobinopathies. Describe the clinical features, investigations, management, and prevention of sickle cell disease	745

3. SAQ: (any five out of six)
 - a. Morphine 745
 - b. Complications of ventilator therapy 746
 - c. Rectal drug therapy..... 747
 - d. Newer antiepileptic drugs 747
 - e. Stem cell therapy 747
 - f. Combination vaccines..... 747

MD Summer 2022**748**

1. LAQ: Define severe acute malnutrition (SAM). Enumerate the indications for admission of a child with SAM to a healthcare facility. Describe the in-hospital/facility-based care required to be provided to child with SAM..... 748
2. LAQ: A 5-year-old child presents with a third episode of pneumonia. Enumerate the possible causes and describe the differential diagnosis for repeated episodes of pneumonia 748
3. SAQ: (any five out of six)
 - a. Therapeutic uses of intravenous immunoglobulin (IVIG) in children 748
 - b. Rotavirus vaccine 749
 - c. Diagnosis of drug-resistant tuberculosis in children 749
 - d. Enzyme replacement therapy for Gaucher's disease 749
 - e. Liver transplantation in children 750
 - f. Newborn hearing screening 750

MD Summer 2021**752**

1. LAQ: State recent guidelines on diagnosis and management of rheumatic carditis..... 752
2. LAQ: Describe etiology and current concepts about the management of parapneumonic effusion in children 752
3. SAQ: (any five out of six)
 - a. Newer modalities of treatment of retinopathy of prematurity (ROP)..... 753
 - b. Human papillomavirus vaccine 754
 - c. Enumerate the breastfeeding indicators..... 755
 - d. Hunger index..... 755
 - e. Child death audit..... 756
 - f. Hypotonia in an infant 758

MD Summer 2020**759**

1. LAQ: Enumerate the autism spectrum disorders. Describe the clinical manifestations, diagnosis, differential diagnosis, epidemiology, treatment, and prognosis of autistic disorder 759
2. LAQ: Enumerate conditions associated with chronic hypertension in children. Describe the etiopathogenesis, clinical findings and manifestations, approach to diagnosis, treatment, complications, and prevention of chronic hypertension in children 759
3. SAQ (any five out of six)
 - a. Anticoagulant and thrombolytic therapy in pediatric practice 760
 - b. Refractory, incomplete, and atypical Kawasaki disease..... 760
 - c. H1N1 (Swine flu) infection in children..... 762
 - d. Use of probiotics in children 764
 - e. Autoimmune encephalitis in children..... 764
 - f. Microarray and DNA sequencing for diagnosis 765

MD Winter 2019**768**

1. LAQ: Define prebiotics and probiotics. Explain their physiological mechanism of action. Describe the effects of probiotic in various gastrointestinal disorders..... 768
2. LAQ: Describe the methods for diagnosis of fetal disorders. Describe the fetal medical and surgical therapeutic options for various fetal disorders 769

3. SAQ: (any five out of six)
 - a. Decision making for life-sustaining therapies in pediatric intensive care 770
 - b. Pentavalent vaccine and adverse events following immunization 771
 - c. Impact of implementation of Navjat Shishu Suraksha Karyakram (NSSK) on neonatal mortality rate (NMR) in Maharashtra 771
 - d. Hemophagocytic lymphohistiocytosis syndrome in dengue hemorrhagic fever 772
 - e. Polymerase chain reaction and its significance in clinical practice 772
 - f. Comparison of high-dose versus low-dose aspirin in the management of Kawasaki disease 774

MD Summer 2019**775**

1. LAQ: Discuss the conditions appropriate for pediatric palliative care. Describe recent guidelines and detail pharmacological approach for pediatric pain management 775
2. LAQ: Discuss the rationale behind change of new American Heart Association guidelines 2010 for pediatric resuscitation. Describe the approach to a child presenting with supraventricular tachycardia with poor pulse. Add a note on automated external defibrillation 778
3. SAQ: (any five out of six)
 - a. High-frequency ventilation 779
 - b. Recent management modalities and approach to fluid refractory septic shock 780
 - c. Modalities for intrauterine diagnosis of fetal diseases 781
 - d. Allergen immunotherapy: Indications and contraindications for treatment of allergic disorders 781
 - e. Newer approaches in management of congestive cardiac failure in children 781
 - f. Umbilical cord blood banking for stem cell transplantation 782

MD Winter 2018**784**

1. LAQ: Emergency medical services for children 784
2. LAQ: The genetic approach in pediatric medicine 786
3. SAQ: (any five out of six)
 - a. Therapeutic hypothermia 788
 - b. Stem cell therapy 790
 - c. Neurological complications of nutritional anemias 790
 - d. Levetiracetam 792
 - e. Hyperbaric O₂ therapy 793
 - f. Vitamin B₆ 794

MD Summer 2018**796**

1. LAQ: What is stem cell transplant? Discuss indications, availability, and problems of stem cell transplantation in India 796
2. LAQ: A 3-year-old child presents with recurrent wheezing. Discuss newer modalities of childhood asthma 796
3. SAQ: (any five out of six)
 - a. Newer antifungal drugs 799
 - b. Newer surfactant 801
 - c. Dengue vaccine 803
 - d. Prevention of mother-to-child transmission (PMTCT)—newer concepts 804
 - e. Treatment of MDR-TB 804
 - f. Ebola virus 804

MD Summer 2017**807**

1. LAQ: Enumerate risk factors for thrombosis in children. Describe clinical features, diagnosis, laboratory investigations, treatment, and complications of thrombotic disorders in children 807
2. LAQ: Describe etiopathogenesis, clinical features, diagnosis, and management of type 1 diabetes mellitus in children 809

3. SAQ: (any five out of six)
 - a. Biomarkers of acute kidney injury 812
 - b. Tumor lysis syndrome 813
 - c. Kawasaki disease 815
 - d. Donor human milk banking 818
 - e. GeneXpert 820
 - f. Enzyme replacement therapy 821

MD Summer 2016**823**

1. LAQ: Describe the etiology, classification, pathophysiology, clinical manifestations, management, and prognosis of hemolytic uremic syndrome (HUS) 823
2. LAQ: Enumerate the causes and describe the pathophysiology, clinical features, monitoring, and management of raised intracranial pressure in children 826
3. SAQ: (any five out of six)
 - a. Umbilical cord blood transplantation 828
 - b. Japanese encephalitis vaccine 828
 - c. Therapeutic cooling for perinatal asphyxia 830
 - d. Pediatric cochlear implant 830
 - e. Pediatric palliative care consultation 831
 - f. Immunosuppressive therapy 831

MD Winter 2015**833**

1. LAQ: Describe in detail status of stem cell transplantation including indications, feasibility, and problems 833
2. LAQ: Describe newer vaccine. Discuss adverse events after vaccination and vaccines in special situations 837
3. SAQ: (any five out of six)
 - a. Embolization as an intervention 842
 - b. Carnitine therapy 843
 - c. ECMO therapy 845
 - d. Peri-implantation genetic diagnosis 847
 - e. High-dose sequential phenobarbital therapy 848
 - f. Evidence-based medicine 849

MD Summer 2014**852**

1. LAQ: Discuss in details, newer modalities of treatment and newer anticonvulsants in management of childhood seizures 852
2. LAQ: Describe in details, clinical manifestations, diagnosis, and management of supraventricular tachycardia in infant 854
3. SAQ: (any five out of six)
 - a. Vasopressors in septic shock 857
 - b. Genes involved in oncogenesis 859
 - c. Management of multidrug-resistant tuberculosis 860
 - d. Vitamin D deficiency in childhood, current guidelines on diagnosis and management in brief 862
 - e. Modes of alleviation of pain in neonates 862
 - f. Neonatal resuscitation current guidelines 864

Solved Paper—IV 1–12 Questions**865**

1. Compulsive digital gaming 865
2. Mission Indradhanush 867
3. National Nutrition Strategy 869
4. Newer Strategies for Improving the Newborn Health in India 872
5. Newer Drugs for Tuberculosis Prevention and Treatment in Children 874
6. Nikshay Poshan Yojana 875

7. Newer diagnostic tests in pediatric TB	876
8. Telemedicine in pediatric practice.....	879
9. Multiplex molecular assays for diagnosis of infectious agents	881
10. Emergency Triage Assessment and Treatment (ETAT) Guidelines	883
11. Apgar score	885
12. MIS-C.....	887

Paper—I

DNB Pediatrics June 2022

889

1a. Describe/diagrammatic presentation of fetal circulation	889
1b. Describe the management of primary pulmonary hypertension.....	889
2a. Describe the bilirubin metabolism in neonates	890
2b. Describe the management approach in a baby with prolonged jaundice.....	890
3a. Discuss the risk biases and confounding factors in a clinical study	890
3b. Describe forest plot and its interpretation.....	891
4a. Describe the types of clinical study designs	892
4b. Elaborate the Grading of Recommendations, Assessment, Development and Evaluation (GRADE) approach to evaluate the level of evidence	893
5a. Describe the development of diaphragm.....	894
5b. What are the current recommendations for management of diaphragmatic hernia?.....	895
6a. Describe the iron metabolism in the human body.....	895
6b. Describe the management of hypochromic microcytic anemia in children.....	896
7a. Describe the Sodium (Na) homeostasis in the body.....	896
7b. Outline the management of a 10-kg weight boy with hypernatremic dehydration.....	897
8a. Describe national immunization schedule.....	897
8b. Discuss the methods of disinfection.....	898
9a. Describe malaria surveillance.....	899
9b. Elaborate the Janani Shishu Suraksha Karyakaram (JSSK).....	901
10a. Describe the pathophysiology of diabetic ketoacidosis.....	901
10b. Describe the management of childhood diabetes.....	902

Paper—II

DNB Pediatrics June 2022

903

1a. What are the types of surfactants used in neonates?.....	903
1b. Explain the lung protective strategy in neonatal ventilation.....	903
2a. Discuss the approach to a neonate with a disorder of sexual development.....	904
2b. Describe hemorrhagic disease of newborns	905
3a. Explain about the oral drugs in the management of hemophilia.....	905
3b. Discuss the complications of blood transfusion.....	906
4a. Discuss the approach to a 2-year-old boy with polyuria	907
4b. Describe the advances in management of steroid-resistant nephrotic syndrome.....	908
5a. Outline the management of a 2-year-old conscious child with severe acute malnutrition having diarrhea with severe dehydration.....	908
5b. Discuss the dietary advice for a 1-year-old child.....	909
6a. Discuss about the approach to a 6-year-old boy with a short stature.....	909
6b. Explain the WHO growth charts	911
7a. Discuss the diagnostic approach to a floppy infant	911
7b. Discuss the steps of acute flaccid paralysis surveillance	911
8a. Describe neutrally adjusted ventilatory assist (NAVA).....	911
8b. Describe neurocutaneous markers	912

9a. Enumerate oncological emergencies in newly diagnosed cases of acute leukemia	912
9b. Write clinical features, management, and long-term outcome of B ₁₂ deficiency in children	914
10a. Explain the process for the transportation of a sick newborn.....	914
10b. Discuss the probable complications in monozygotic twins.....	914

Paper—III

DNB Pediatrics June 2022

916

1a. Discuss about severe combined immunodeficiency	916
1b. Discuss the early diagnosis and management of autism spectrum disorder	917
2a. Discuss the classification of birth defects	917
2b. How do you approach to a suspected case of inborn errors of metabolism?	918
3a. Explain pulse oximetry screening for critical congenital heart disease	918
3b. What is the approach to managing a neonate with cyanotic congenital heart disease?.....	920
4a. Describe the diagnosis of arrhythmias in children and elaborate on their immediate management in the emergency room	921
4b. What is the approach to a child brought to the emergency room with a history of road traffic accident (RTA)?	924
5a. What is the management of acetaminophen poisoning?	925
5b. Explain pulmonary function test in childhood asthma.....	925
6a. Discuss the etiology, diagnosis, and management of congenital hypothyroidism.....	925
6b. Describe the diagnosis and management of growth hormone deficiency.....	925
7a. Describe the etiopathogenesis, clinical manifestation, and management of portal hypertension in children	925
7b. Define acute liver failure in children and how to manage it	925
8a. What is ophthalmia neonatorum?	926
8b. Describe about hearing assessment screening in children.....	927
9a. What is bulimia nervosa?	927
9b. What are anthelmintic drugs?	928
10a. Describe diagnostic evaluation of celiac disease	928
10b. Explain hemophagocytic lymphohistiocytosis in children.....	928

Paper—IV

DNB Pediatrics June 2022

931

1a. Fetal surgery	931
1b. Vaccine hesitancy.....	932
2a. Pattern of inheritance and diagnosis of mitochondrial diseases	933
2b. Indication of next-generation sequencing in pediatric hematology-oncology	933
3a. Antibiotic stewardship.....	934
3b. Advances in management of cystic fibrosis.....	934
4a. Liver transplantation in children	935
4b. Volume-targeted ventilation	935
5a. Changes in American Heart Association Guidelines in 2020 for pediatric advanced life support.....	936
5b. Functional renal imaging and renography	937
6a. Updated definition of elevated blood pressure, stage 1 and stage 2 hypertension in children.....	938
6b. Discuss evaluation of a child with BP >95th centile + 12 mm Hg recorded twice during OPD visits	938
7a. Rituximab.....	938
7b. Describe renal angina index and its scoring	938
8a. Antenatal diagnosis of Down syndrome.....	939
8b. Intrauterine transfusion.....	939
9a. Extracorporeal membrane oxygenation (ECMO)	941
9b. Near-infrared spectroscopy (NIRS).....	941

10a. Artificial intelligence in medical science	941
10b. Mission neonatal early evaluation vision	942

Paper—I

DNB Pediatrics December 2021

944

1a. Explain rotation of gut during embryonic development and discuss its applied aspects.....	944
1b. Discuss the development of diaphragm with applied aspects.....	944
2a. Describe the applied anatomy of brachial plexus.....	945
2b. What is the internal capsule and its applied anatomy?	946
3a. Explain pulmonary function tests for asthma	946
3b. Describe the physiology of lactation	947
4a. Explain CSF circulation with applied aspects.....	947
4b. Discuss the ECG changes and management of hyperkalemia	947
5a. Describe urea cycle disorders.....	947
5b. Explain how the composition of rehydration solution is prepared for malnourished children	949
6a. What is the pathophysiology of dengue fever?	949
6b. Define chronic constipation and discuss its pathology	949
7a. What is the pharmacokinetics action of acetaminophen?	950
7b. Describe insulin analogs.....	951
8a. What is Hodgkin's lymphoma? Discuss its pathophysiology	952
8b. Discuss nonaccidental injuries	952
9a. Discuss on Rashtriya Bal Swasthya Karyakram.....	952
9b. What are DOI Guidelines for child adoption?	952
10a. Discuss the MR campaign in India	952
10b. Define following screening tests: Lead time, sensitivity, specificity, and positive and negative predictive values	953

Paper—II

DNB Pediatrics December 2021

954

1a. Discuss the significance of Mission Indradhanush	954
1b. Discuss the types of adverse events following immunization	954
2a. What are the imaging guidelines for urinary tract infections in children?.....	954
2b. Describe the indications for renal biopsy.....	955
3a. Discuss the early diagnosis and prevention of neural tube defects.....	955
3b. Explain in detail about childhood migraine.....	955
4a. Elaborate on management guidelines for the immune thrombocytopenic purpura	957
4b. Describe the clinical presentation and management of sickle cell crisis	957
5a. Discuss the cytogenetics and risk stratification in acute lymphoblastic leukemia	957
5b. Discuss the indications and complications of a bone marrow transplant	957
6a. Discuss super ORS and advantages over ORS	957
6b. Describe the classification and preventive measures for vitamin A deficiency	958
7a. Discuss the modalities of management in neonatal HIV.....	959
7b. Define TORCH infections and its prevention.....	959
8a. What is the management of a premature baby in labor room?.....	959
8b. What are the steps included in BFHI?	959
9a. What is the management for neonates of Rh-negative mother?.....	959
9b. What is the approach for neonates born to COVID-positive mothers?	959
10a. Discuss the therapeutics for inhaled nitric oxide therapy.....	961
10b. What are the indications of ECMO?	961

Paper—III

DNB Pediatrics December 2021

962

1a. What is the management of fulminant hepatic failure in children?	962
1b. Discuss the modalities of bioartificial liver	964
2a. Discuss the etiology, diagnosis, and management of upper GI bleed in children	965
2b. Describe chronic granulomatous disease	966
3a. Describe the management of diabetic ketoacidosis.....	968
3b. Describe the management of cyanotic spell	968
4a. What is the preventive prophylaxis and management of infective endocarditis?.....	968
4b. Give the classification of coronary involvement and management of Kawasaki disease	968
5a. Discuss the health needs and health problems of adolescents.....	968
5b. Explain the approach in management for unknown poisoning.....	968
6a. Discuss the ocular manifestations of systemic diseases	971
6b. What are the indications and modalities of audiological evaluation?.....	972
7a. Elaborate on the guidelines in management for the POCSO Act.....	973
7b. What is nocturnal enuresis?	973
8a. Describe the classification and diagnosis of juvenile rheumatoid arthritis in children.....	973
8b. Elaborate on the management of primary immunodeficiency	973
9a. Explain the antenatal diagnosis of congenital malformations.....	973
9b. Discuss fetal therapy	974
10a. Discuss the diagnosis and management of MDR-TB	974
10b. Describe about the guidelines for antitoxin therapy in diphtheria	974

Paper—IV

DNB Pediatrics December 2021

975

1a. What is the management of gastroesophageal reflux disease (GERD)?	975
1b. What are the recent advances in management for Duchenne muscular dystrophy?.....	975
2a. Discuss the classification and management of pediatric COVID	976
2b. Discuss the approach for malaria vaccines. Explain the significance of RTS,S/AS01 vaccine.....	978
3a. What are all possible radiologic and echocardiographic findings of rheumatic heart disease?.....	979
3b. Describe fetal surgical therapy.....	979
4a. Discuss the causes of metabolic acidosis and its compensation by the body	979
4b. What are the recent advances in management of hemophilia?	979
5a. Explain hemophagocytic lymphohistiocytosis in children.....	980
5b. Discuss the management of pediatric stroke.....	981
6a. How to measure and interpret end-tidal CO ₂ ?	981
6b. Discuss the management of attention-deficit hyperactivity disorder in children	982
7a. What is congenital talipes equinovarus? Discuss its management.....	982
7b. Discuss the classification and clinical features of mucopolysaccharidoses.....	983
8a. What are the guidelines in management for a dog bite in children?	983
8b. Explain enzyme replacement therapy.....	983
9a. What is the use of monoclonal antibody in pediatric practice?.....	983
9b. What are the indications of plasmapheresis in children?.....	985
10a. What are newborn screening tests? Discuss its interpretation	985
10b. Elaborate on the presentation and management of temper tantrums in children.....	985
