

VOLUME-1

Section 1: General Physiology

1. Defining the Role of Physiology in Modern Medicine	3
2. Functional Organization of Human Body	7
3. Principles of Homeostasis	9
4. Cellular Organization, Cell Functions and Intercellular Connections	14
5. Physiology of Genetics and Apoptosis	30
6. Transport across the Cell Membrane	41
7. Membrane Potential	58
8. Body Fluids	63

Section 2: Blood and Immunity

9. Introduction to Blood and Plasma Proteins	73
10. Bone Marrow and Hemopoiesis	78
11. Red Blood Cells	85
12. Erythropoiesis	91
13. Destruction of Red Blood Cells	100
14. Hemoglobin and Blood Indices	104
15. Pathophysiology of Anemia and Polycythemia	110
16. Blood Groups and Physiological Basis of Blood Transfusion	116
17. Leukopoiesis	127
18. White Blood Cells	134
19. Thymus and Lymphoid Tissues	150
20. Physiology of Immunity	156
21. Organ Transplantation and Applied Aspects of Immunity	174
22. Introduction to Hemostasis, Thrombopoiesis and Structure and Properties of Platelets	180
23. Role of Platelets in Hemostasis and Applied Aspects of Platelets	188
24. Blood Coagulation	194
25. Anticoagulants and Applied Aspects of Blood Coagulation	205

Section 3: Nerve and Muscles

Part A: Nerve

26. Structure and Functions of Neurons	215
27. Nerve Potentials and Propagation of Nerve Impulse	224
28. Properties and Classification of Nerve Fibers, Nerve Injury and Other Applied Aspects	236

Part B: Neuromuscular Junction

29. Neuromuscular Transmission	242
--------------------------------	-----

Part C: Muscles

30. Structure of Skeletal Muscle: Physiological Aspects	250
31. Excitation-Contraction Coupling and Molecular Basis of Skeletal Muscle Contraction	258
32. Skeletal Muscle: Properties, Fiber Types and Applied Aspects	265
33. Smooth Muscle and Cardiac Muscle	274

Section 4: Autonomic Nervous System

34. Functional Organization of Autonomic Nervous System	285
35. Sympathetic System	293
36. Parasympathetic System	300
37. Control of Autonomic Functions and Applied Aspects	304
38. Autonomic Function Tests	310
39. Heart Rate Variability	315
40. Blood Pressure Variability and Baroreflex Sensitivity	321

Section 5: Cardiovascular System

Part A: General Introduction

41. Functional Organization of Cardiovascular System	329
--	-----

Part B: Heart

42. Functional Anatomy of Heart, Cardiac Innervation and Cardiac Muscle	337
43. Properties of Cardiac Muscle	346
44. Electrophysiology of the Heart	352
45. Conducting System of Heart; Origin and Spread of Cardiac Impulse	359
46. Electrocardiogram	363
47. Cardiac Cycle	384
48. Cardiac Output	394
49. Heart Rate and Arterial Pulse	408

Part C: Circulation

50. Principles of Hemodynamics	414
51. Arterial System	420
52. Capillary Circulation	425
53. Lymphatic System and Lymphatic Circulation	431
54. Venous System	434
55. Regulation of Blood Pressure	437
56. Integrated Regulation of Cardiovascular Functions	456
57. An Overview of Regional Circulation	460
58. Cerebral Circulation	463
59. Coronary Circulation	468
60. Cutaneous, Splanchnic and Skeletal Muscle Circulation	473
61. Fetal and Neonatal Circulation	480

Part D: Applied and Clinical Aspects of CVS

62. Pathophysiology of Hypertension, and Syncope	483
63. Pathophysiology of Shock	488
64. Pathophysiology of Heart Failure	493

Section 6: Respiratory System

65. Functional Organization of Respiratory System	501
66. Mechanics of Breathing	508
67. Pulmonary Ventilation	530
68. Pulmonary Circulation and Ventilation-Perfusion Ratio	535
69. Diffusion and Gas Exchange in Lungs	543
70. Oxygen Transport	547
71. Carbon Dioxide Transport	555
72. Regulation of Respiration	558
73. Physiological Changes at High Altitude	574
74. Hypoxia, Cyanosis, and Oxygen Therapy	578
75. Hazards of Deep Sea Diving and Effects of Increased Barometric Pressure	585

76. Respiration in Abnormal Conditions and Abnormal Respirations	588
77. Artificial Ventilation and Cardiopulmonary Resuscitation	592
78. Pulmonary Function Tests	596

Section 7: Gastrointestinal System

Part A: Introduction to GI System

79. Functional Organization of GI System and Principles of GI Regulations	605
80. Gastrointestinal Hormones	613

Part B: GI Secretions

81. Principles of GI Secretion and Secretion of Saliva	619
82. Gastric Secretion	626
83. Pancreatic Secretion	640
84. Physiology of Liver, Liver Function Tests, and Pathophysiology of Jaundice	649
85. Biliary Secretion	656
86. Intestinal Secretion	661
87. Secretion of Large Intestine	666

Part C: GI Motility

88. Introduction to GI Motility	670
89. Chewing and Deglutition	675
90. Esophageal Motility	678
91. Gastric Motility	681
92. Small Intestinal Motility	689
93. Motility of Large Intestine	693

Part D: Digestion and Absorption

94. Principles of Digestion and Absorption	698
--	-----

VOLUME-2

Section 8: Renal Physiology

95. General Introduction and Functional Anatomy of Kidney	707
96. Renal Blood Flow	719
97. Glomerular Filtration	724
98. Tubular Functions	731
99. Concentration and Dilution of Urine	746
100. Regulation of Ions and Water Reabsorption in Kidney	752
101. Water Excretion, Diuresis, and Diuretics	756
102. Acidification of Urine	760
103. Regulation of Volume, Composition and Osmolality of Body Fluids Compartments	766
104. Kidney Function Tests and Renal Failure	772
105. Physiology of Micturition and Bladder Dysfunctions	779

Section 9: Endocrine Physiology

106. Introduction to Endocrinology	787
107. Mechanisms of Hormone Action	796
108. Hypothalamus and Hypothalamo-pituitary Axis	808
109. Pituitary Gland: The Anterior Pituitary	814
110. Posterior Pituitary Gland	830
111. Thyroid Gland	837
112. Adrenal Gland: The Adrenal Medulla	854

113. Adrenal Cortex	862
114. Endocrine Pancreas	883
115. Blood Glucose Homeostasis and Pathophysiology of Diabetes Mellitus	899
116. Calcium and Phosphate Metabolism and Physiology of Bone	907
117. Parathyroid Gland	916
118. Role of Calcitonin, Vitamin D and Other Hormones in Calcium Metabolism and Bone Physiology	923
119. Pineal Gland	928
120. Local Hormones	931

Section 10: Reproductive System

Part A: General Reproductive Physiology

121. Sex Differentiation and Development, Puberty and Menopause	939
122. Physiology of Puberty and Menopause	947

Part B: Male Reproductive Physiology

123. Male Reproductive System	952
124. Spermatogenesis	959
125. Testicular Hormones and Testicular Abnormalities	965

Part C: Female Reproductive Physiology

126. Female Reproductive System and Oogenesis	971
127. Development of Ovarian Follicle and Ovulation	976
128. Menstrual Cycle and Menstrual Disorders	984
129. Ovarian Hormones, Control of Ovarian Functions and Applied Aspects	990

Part D: Physiology of Conception, Pregnancy, Lactation and Contraception

130. Physiology of Copulation	997
131. Pregnancy and Parturition	1001
132. Physiology of Breast Development and Lactation	1015
133. Physiology of Contraception	1019

Section 11: Neurophysiology

Part A: Introduction to Neurophysiology

134. Functional Organization of Nervous System	1025
135. Synaptic Transmission in Central Nervous System	1031

Part B: The Sensory System

136. Introduction to Sensory System and Physiology of Receptors	1045
137. Sensory Communication to Spinal Cord	1052
138. Ascending Pathways	1057
139. Physiology of Pain, Itch and Temperature	1064
140. Trigeminal System	1074
141. Thalamus	1076
142. Sensory Cortex	1083
143. Sensory Abnormalities	1086

Part C: The Motor System

144. Introduction to Organization of Motor System	1090
145. Segmental Organization of Motor System	1094
146. Muscle Spindle and Golgi Tendon Organ	1098
147. Spinal Reflexes	1104
148. Supraspinal Control: The Descending Pathways	1111
149. Regulation of Muscle Tone, Posture and Movement: Spinal, Medullary, Midbrain and Cortical Integration	1122
150. Basal Ganglia	1134
151. Cerebellum	1140
152. Vestibular Apparatus	1148

Part D: Hypothalamus, EEG and Sleep; Limbic Functions and Higher Functions of Brain and CSF

153. Functions of Hypothalamus	1155
154. Physiology of Reticular Activating System	1163
155. Electroencephalography, Physiology of Sleep and Brain Death	1166
156. Limbic System	1177
157. Physiology of Learning and Memory	1186
158. Physiology of Language and Speech	1194
159. Neocortex (Association Cortex) and Cerebral Asymmetry	1198
160. Functions of the Lobes of the Brain and Cortical Plasticity	1202
161. Cerebrospinal Fluid	1207

Section 12: Special Senses**Part A: Vision**

162. Functional Anatomy of Eye	1217
163. Image Forming Mechanisms	1224
164. Photoreceptor Mechanism	1229
165. Visual Pathway and Visual Cortex	1233
166. Visual Acuity, Visual Field, Light and Dark Adaptations and Visual Reflexes	1240
167. Color Vision	1245
168. Movements of the Eye	1250
169. Electrooculography, Electroretinography and Visual Evoked Potentials	1253

Part B: Hearing

170. Functional Anatomy and Functions of the Ear	1256
171. Auditory Pathways	1262
172. Mechanisms of Hearing	1265
173. Hearing Defects and Hearing Tests	1271

Part C: Smell and Taste

174. Physiology of Smell	1275
175. Physiology of Taste	1280

Section 13: Integrative Physiology

176. Structure and Functions of the Skin	1289
177. Regulation of Body Temperature and Acclimatization to Hot and Cold Environments	1293
178. Aviation and Space Physiology	1307
179. Physiology of Exercise and Sports Science	1313
180. Principles of Acid-base Homeostasis	1326
181. Physiology of Growth and Development	1332
182. Physiology of Nutrition	1336
183. Physiology of Aging, Stress and Oxidative Stress	1348
184. Physiology of Yoga and Meditation	1354

*Index**-i*
